PROJECT MANAGEMENT

Results you can count on

We bring it all together for you while protecting your investment!

With any web design/development project, the effectiveness of your coordination and communications can significantly impact the bottom line and success or failures of meeting your objectives. In today's fast paced economy you will need to be prepared to respond faster, deliver better and reduce the costs associated with doing so on a long term basis. You must do so without jeopardizing your web assets or putting client information at risk at any time.

We navigate the challenge of staying on target and within scope, while securely managing the many required aspects of your development project.

Tired of broken promises?

What we promise is what we deliver

Has a lack of competency left your online vision broken down on the highway? If so, an engagement with CNP integrations will calm your anxieties and leave you feeling confident that your vision will be back on track and fulfilled with a higher standard of achievement than you have experienced before.

Our secret is continued process improvement, employment of long term knowledgeable talent and leveraging technology in order to provide transparency and accountability to our clients throughout the project lifecycle.
We Guarantee it!

CNP Integrations is your best partner for building everything you need for online success.

CNP offers a bridge over the great divide between people, the process, and technology.

Effective communication, transparency, true integrity and efficiency are the cornerstones that have driven our results oriented support and management programs.

Proven strategies from our vast pool of experience help our clients receive the absolute best value & support possible.

We strengthen your team
Make us your competitive advantage!

There is nothing more frustrating than not having an answer to a technical question when you need it. The stress of not knowing how to fix something or who to call when you need help can often leave you stressed and discouraged.

You will get the answers you need and the help you need when you need it.

Real time project status
Know where you are at all times!

Our project management team is responsive through open communication and real-time project lifecycle management. Our proven processes and powerful infrastructures reduce risk, minimize costs and lower stress.

Project Managers at CNP Integrations are extremely knowledgeable, resourceful and have access to support teams of highly specialized engineers and programmers to help them solve your technical issues and deliver even the most complex integrations.

CONSULTING & DESIGN

CNP Integrations is your best technology partner when your website needs to stand out from competitors.

"LOOK SHARP, ACT SMART and the rest will follow." Design is a vital communication ingredient and the spice for most online and offline successes. When used effectively to the right degree it's simply magic.

CNP's effective digital strategies and creative design elements have positively helped many clients connect better with their customers, improve online user experiences, increased their website traffic and increase sales conversion rates.

Are your strategies clear?
Success requires more than a website.

Finding the "magic bullet" for an effective online success strategy is like finding a "golden goose", once found it allows you to prosper beyond your wildest expectations.

In our unique discovery process we carefully evaluate and identify what you are doing both online and offline as it relates to your business or organization. Our aim is to deliver more than just a web site and much more than technical or design superiority. We want you to win new business, benifit from more traffic and offer better customer experiences!

Asking the right questions?
Who-What-Where-When-Why-How?

Our Strategic planning sessions are designed to be constructive planning for your specific business model, priority goals, budget and timeline. We can quickly isolate core objectives and focus priorities according to your resources and timeline by addressing the right questions as:

- **Templates and custom designs**
- **Marketing approaches & strategies**
- **Technical design and budgeting**
- **Strategic design & planning**
- **Search engine optimization**
- **Performance optmization analysis**
- **Responsive device ready objectives**
- **Security and Privacy issues**
- **Long term maintenance strategies**
- **Training Plans**

Futureproof your business
Think one step ahead of your competition

If you are frustrated with the effectiveness of your website's communication with customers or its conversion rates, you are not alone. Often times your offline strategies can contribute to the miscommunication as well causing a disconnect for your social channels.
Maybe it is time for a fresh perspective.

When you engage CNP integrations to develop your digital strategy, marketing or brand identity in conjunction with your portal development you will notice the difference right away. No more disconnect!

Vital business intelligence
Learn from our team of industry leaders

Our training and consulting services will bring you into the loop of industry thought leaders equipping your team with the knowledge and skills they need to get the best results from the technologies deployed.
Managing content should be a comfortable experience that allows your staff to streamline and maximize their expertise.

APPLICATION DEVELOPMENT

Do you need a little magic?
CNP programmers are code wizards.

If you are looking to add unique features to your website, integrate your portal with other existing systems or migrate your data from one framework to another, our expert team can deliver a full range of programming and application development support services.

Your CNP custom application will keep pace with your platform upgrades. Support services can continue well after the development phase of your project. With an ongoing support relationship we will protect your assets and help reduce the risk of security vulnerabilities over time.

CNP uses Git/SVN systems for maintenance and version control management, keeping your long term support costs to a minimum while adding years of service life to your investment.

You Imagine it - we code it!
Yes! ...We can do

Often it is not a question of IF it can be done but rather if doing so will make good business sense. Our team has the experience and skills to implement just about any solution you could imagine but we also realize how important it is that all solutions get implemented within reasonable expectations and within a scope that is affordable and sustainable over time.
We never sell you on what we can do but rather support what you need done within your timeframe and budget.

CNP Integrations is your partner for all Joomla CMS application development.

We develop robust web based applications and mobile ready web portals. Our specialty is building quality Joomla CMS extensions, executing complex custom integrations and also managing data migrations.

Our Standardized code management, transparent development processes, and superior programming talent plus our innovative execution are at the core of our success stories.

Experience better safer more compliant coding and superior run times with CNP development.

No more pain and suffering
CNP Can stop the bleeding right now

It is all too easy to suffer from project run-away and cost overruns when you develop web based applications. Ongoing maintenance if not carefully planned at the beginning of your project can easily create financial drains or leave you with an unsustainable environment. Poor planning or improper code management can also cause vulnerabilities and security risks.

The CNP Integrations team understands these issues and applies common industry standards for implementing professional code management practices. Our leadership teams provide comprehensive oversight on quality control and testing.

Bank on our experience
Built with stability in mind

CNP Integrations has successfully built custom applications in a variety of sectors including Government, Not for Profit, Business and Education.

CNP Integrations can help you build the right solution for today and tomorrow.
