

400% REDUCTION in migration time to VoIP.

ADDITIONAL SAVINGS year over year.

can you afford to wait?

NITRO VoIP Transition Tool

Month over month savings is a key driver in migrating to VOIP, but could you save even more by reducing implementation time? The answer is yes, with the Nitro VoIP Transition Tool by NetPlus.

The NITRO VoIP Transition Tool can help your organization realize the cost savings of VoIP rapidly and migrate over smoothly by automating the transition between your legacy and VoIP PBX. After migration, the tool provides an easy and automated mechanism for bulk changes within your voice infrastructure, providing savings year over year.

Key Areas of Savings

- Significant reduction in implementation time line, utilizing less labor
- Improved ROI with faster realization of VoIP savings

The NITRO VoIP Transition Tool exports data from your current switch and provides you the capability to map your legacy environment to the new VoIP environment based on rules that you select. Load ranges of numbers to be automatically provisioned, saving hours of data collection and manual entry into the switch.

The NITRO VoIP Transition Tool allows your organization to focus on connecting the new phone sets, training users on the new features, and most importantly realizing the cost savings of VoIP faster than you could ever imagine.

The Power of Transition Flexibility

NITRO VoIP Transition Tool allows you to transition users in the most organized, efficient, and least invasive manner while still maintaining control of both your new and legacy systems.

The extraction program combined with flexible queries, provides the ability to organize the transition in a man-

ner that minimizes the inconvenience to the users. The migration is flexible and can be accomplished by building, group, organization, location or other methods to minimize the user impact and streamline the process.

The transition can be scheduled to occur in off hours, so that users leave for the day using the legacy system and, upon arrival the next morning, are converted to the new system and all its benefits.

NITRO VoIP Transition Tool in Action

We'll explore ways to get the most out of your VoIP deployment so that your conversion is accurate and as fast as possible. We'll look at the various methods to help you decide how to move forward with your implementation.

Throughout the migration process minimal switch technician involvement is required. The process can be mostly managed by customer service representatives, order clerks or the end user through a web browser.

NITRO VoIP Transition Tool

About NetPlus NITRO

VoIP Transition Tool is a module of NetPlus NITRO, a solutions suite that enhances the management of your next generation telecommunications environment. The NITRO tools can either be integrated with the highly popular NetPlus TMS or they can be purchased as stand-alone solutions.

NetPlus TMS

NetPlus TMS has been specifically designed for enterprise-level converged networks and can be quickly deployed to provide an integrated view across legacy telecom and VoIP networks.

With its modular architecture and highly customizable design, NetPlus TMS brings a new level of usability to communications network management. Everything is interconnected through the single-image database, assuring smooth workflow and data accuracy.

Its sophisticated modules and applications elevate NetPlus TMS beyond mere telemanagement. Customers use NetPlus TMS for cost management, advanced and automated vendor invoice management and reconciliation. NetPlus TMS allows for an effortless integration and administration of the entire network and communications infrastructure.

About NetPlus

NetPlus is a leading solutions provider for Communications Management for both commercial and government entities. We offer a suite of solutions for expense management, data validation, fault management, inventory tracking and control, provisioning, and more. Our customers include DoD, DoS, United States Air Force, Avaya, Verizon, and the Pentagon. We are a division of Ventraq Corporation.
