FOR IMMEDIATE RELEASE
January 28, 2013

NEW GENERATION GLOBE VALVES AND RETROFIT LINKAGES PROMISE EASY INSTALLATION WITH MORE POWER AND FLEXIBILITY

Danbury, CT, 1BJanuary 28, 2013– Belimo Americas is pleased to announce the release of their New Generation Globe Valve Actuator and Retrofit Linkage solution. The new generation actuator gives globe valves the “extra muscle” they need for applications where higher close-off pressures are required. The actuator offers greater force (up to 1011 lbf) with a reinforced rugged design, a selectable fail-safe position switch and a quick connect coupler, making installation quick and easy. With a retrofit linkage that adjusts to most globe valves, this actuator provides increased flexibility with reduced inventory.

“With its innovative valve clamp and quick connect coupler, the New Generation Globe Valve Actuator can be installed and adapted in minutes”, states Joseph Carcare, Product Manager for Belimo Retrofit Solutions.

“Engineered to suit a broad range of HVAC applications, the new generation actuator and retrofit linkages are highly adaptable making selection, installation and service hassle-free.”

###

Belimo Americas, a world leader in the design and manufacture of damper actuators and control valves used in commercial HVAC systems. Known for its direct-coupled actuator and innovations in pressure independent control valve technology, Belimo has solutions to maintain an efficient building environment. For over 30 years, Belimo has provided innovations in Comfort, Energy Efficiency and Safety Solutions to customers throughout the United States, Canada and Latin America, all of which are backed by Belimo’s unsurpassed 5-year warranty. For more information, contact Belimo at 1-800-543-9038 or visit the website at www.belimo.com or www.piccv.com.
