

TURN LEGACY PROCESSOR DATA INTO INTELLIGENT & ACTIONABLE INFORMATION.

What is a Prepaid Management Platform?

By leveraging ARM's experience in transforming processor transaction data, ARM offers its PMP to Program Managers to provide transaction visibility, optimize business operations and maintain compliance.

What problem are we solving?

Historically processor data files have been extremely difficult and cumbersome to report on. ARM's PMP takes the pain out of obtaining a robust reporting platform and provides it to Program Managers as a simple SaaS subscription.

“ Without ARM's Platform we could not run our business today...ARM's Prepaid Management Platform turns legacy data into valuable management information, allowing us to run our business much more efficiently. ”

-Burke Rice, EVP, TFG Card Solutions, Inc.
