

Complete Currency Trader: Review Of James Edward's Advanced Forex Trading Course Released

Summary: WealthSpringMarketing.com releases a review of James Edward's Complete Currency Trader program which promises to give traders a much needed "edge" in the foreign exchange market.

James Edward's has just reopened admission to his exclusive Complete Currency Trader training course creating a buzz of excitement throughout the Forex trading community and prompting a review by WealthSpringMarketing.com's Tiffany Hendricks.

"Complete Currency Trader is an very exclusive program intended for those serious about building real Forex trading businesses," reports Hendricks. "In recent months we have backed away from reviewing Forex training systems and software because there's so much garbage out their right now being billed as 'the next big thing', so when we were informed about Edward's Complete Currency Trader course opening up for new students we were eager to write a comprehensive review for our website visitors. As discussed in our review, Edward's program is the complete antithesis of the slickly marketed EAs and other push button Forex trading packages we have been inundated with of late. Instead of simply delivering a shallow 'system' for Forex trading, Edward goes deep into explaining the micro-mechanics of how the Forex market really operates, and how to properly leverage and this knowledge. This understanding alone gives traders an invaluable edge over the vast majority of aspiring traders who just don't understand the market at a fundamental level."

As Hendricks' Complete Currency Trader review reveals the program has five main components. In addition to the Advanced Education Package, users gain access to the Complete Currency Trading System itself, Video Trainings that provide an "over the shoulder" view of Edward trading Forex, Edward's Six Phase Trading Process, Edward's proprietary Analysis Software, as well as ongoing support from Edward himself.
