DIGITAL SIGNAGE SOFTWARE

EFFICIENT DESIGN - EXTRAORDINARY PERFORMANCE

PRESS—FOR IMMEDIATE RELEASE—March 4th 2013

SOUTH AFRICAN BIDVEST BANK DEPLOYS SWISS INTERACTIVE SIGNAGE

Swiss NAVORI QL was awarded the South African BIDVEST BANK signage contract.

Bidvest Bank is part of the Bidvest Group of companies.

They are currently refurbishing all of their branches and wanted a system to easily and effectively cross-market other financial products of the group, such as loans, insurance as well as travel products. EZITECH—the South African certified NAVORI partner provided the technology together with Flight Communications.

The Bidvest bank Digital Signage set-up is an interactive scenario where part of the branch window is converted into a touch screen. This is done with rear projection on a touch film substrate on the glass. Content is interactive and customers can browse through the different offers—a serious extension to the current portfolio available in the Bank.

In a second stage the scenario will also extend to triggering content in function of the viewer's profile and audience metering as well as producing user statistics.

The NAVORI QL Digital Signage platform will be rolled out to 80 BIDVEST BANK Branches once the pilot project is fully completed.

Apart from extending the product offering the Bank also wanted to increase the customer experience in their branches. The stunning and unique TV grade playback quality of NAVORI QL attributed to this success.
