

Emergency Planning and Training Services

What We Do:

Starting with our very first meeting, we work with you and your safety committee to review and improve your existing emergency plan, develop a comprehensive training program to improve your level of readiness, and conduct a thorough review of your facility to identify potential issues.

We also have the emergency kits and supplies that your organization needs in the event of an emergency.

Our Training Programs:

1. Basics of Emergency Planning. This program focuses on the essentials of emergency plan development and prepares your staff to work on your specific emergency plan.

2. Emergency Plan Training and Drills. This training is specific to your organization's emergency plan. At the end of the two modules your staff will understand the plan and have practiced all of the major response action drills.

Why Us:

Our team is composed primarily of veterans with over 90 years of combined service. Each member of the team has proven themselves through combat command and has extensive experience in disaster response and planning. Team members have commanded response forces and/or participated in several disaster responses to include the 2005 crash of a civilian airliner in Afghanistan, Hurricane Katrina 2005, Southwest New Hampshire Flooding in 2005, New Hampshire Statewide flooding in 2006, Epsom, NH tornado response in 2007, the 2008 New England Ice Storm, 2009 Anthrax Response in Durham, NH, the 2010 NH Wind Storm, Hurricane Irene in 2011, the October 2011 New England Snow Storm and Super Storm Sandy in October 2012.

Bottom Line: We have been there and done that.

**Concerned about cost?
We have programs that
fit almost any budget.
The first meeting is free.
After that, you decide.**
