

## **ROCKLER LAUNCHES TRIM ROUTER CIRCLE CUTTING JIG**

### **New Jig Outfits Trim Routers for Portable Circle Cutting Applications**

MEDINA, MN (March 13, 2013) - Rockler Woodworking and Hardware has introduced the Trim Router Circle Cutting Jig, a device that interfaces with trim routers for precise circle routing applications. The jig allows an infinitely adjustable range of 6" to 36" circle cutting diameters and is compact enough to fit in most tool boxes. The Trim Router Circle Cutting Jig is also lightweight, making it easily portable for use on job sites as well as at home in the shop.

"The Trim Router Circle Cutting Jig essentially helps people get more out of their trim router," says Scott Ekman, Vice President of the Marketing Department. "Uniform circles are virtually impossible to make with a router unless you have a jig to guide the process, and this jig delivers that capability in a durable, portable package for those smaller routers. It really opens up a new world of possible uses for your trim router."

The Trim Router Circle Cutting Jig is pre-drilled to fit many popular router models from Porter Cable, DeWalt and Bosch and can easily be drilled to fit other less common routers. It is made of 1/4" phenolic which provides extreme durability during use. The center pivot pin is tightened with a four-star knob and T-bolt to ensure that the jig stays in place throughout the routing process.

The Trim Router Circle Cutting Jig (48871) retails for \$36.99 and can be purchased at Rockler Woodworking and Hardware stores nationwide, Rockler independent resellers, [Rockler.com](http://Rockler.com), or from the Rockler catalog. For store locations or a free catalog, please visit [www.rockler.com](http://www.rockler.com) or call 1-877-ROCKLER.
