TOOLS THAT LAY A
STRONG FOUNDATION
FOR:

Estimating

Bid Management

Scheduling

Sub-contract
Management

Time & Equipment

Job Costing

Keeping It Simple

While QuickBooks is great for writing checks and tracking balances, it simply isn't designed to provide the "true" job costing features you need to build your business.

Job Simplicity keeps it simple, allowing you to add full-scale building management software that plugs right into QuickBooks. You get tools to manage everything from bidding to building in one affordable, out-of-the-box solution. So why renovate your accounting software when all you need is Job Simplicity?

Building a Smarter Solution

With Job Simplicity, one entry carries through your entire system and flows seamlessly to your QuickBooks accounting software.

Take control of profits with real time variance & cost-to-complete reporting, cash flow forecasting and profit analysis.

Plug-and-Play Simplicity

Job Simplicity is designed to be up and running quickly with simple installation and expert support. With features for job costing, estimating, and scheduling, you can bid, build and manage just like your larger competitors.

Job Simplicity Features ...

Whether you're a small commercial painter, drywaller, or electrician, Job Simplicity hammers the competition with construction management features like::

- *True **job costing** with flexible work-break down structures*
- ***Estimating** tools for unit take-off and bid management*
- *POs & **subcontracts** generated from an estimate with the click of a button*
- *Set up multiple **schedules** per job, including conflict control & trade notifications*
- *"What If" pricing/profit scenarios for jobs, models, and options based on actual or forecasted costs*
- *AP invoice **workflow** with scanning optimized for PO and **Subcontract approval***
- ***Use the Web** to share information, documents & drawings with your trades & customers.*
- *Manage schedules & request POs from the field on any handheld device*
