Immunization Plus

The TransactRx National Immunization Network

One contract with TransactRx immediately enables you to be reimbursed for flu and pneumonia vaccines administered to patients with Medicare Part B or coverage with contracted payers.

If you meet your state requirements to administer vaccines and are not excluded from government programs you meet our network enrollment requirements.

We Deal With Medicare, So You Don't Have To!

- NO MEDICARE ID REQUIRED
- Eliminates the $523 Medicare fee
- No Medicare paperwork required.

Hands Off Claim Management

- No Coding Knowledge Required

- NDC Codes are Translated to appropriate CPT or HCPC codes

- Appropriate payer specific diagnosis codes are appried at the clearinghouse

- We Bill, Collect, Reconcile and Send Payments to you twice a month with one consolidated remittance advice report.

For additional information about the TransactRx Pharmacy solution and other services offered by TransactRx, visit our website at www.TransactRx.com or call 800.971.3890 to speak with a representative.

Changing The Way That Pharmacies Bill For Vaccines

Use your existing pharmacy software or our web-based software to submit claims and manage reimbursement for flu, pneumonia and all other adult and pediatric vaccines. Submit claims to Medicare Part B, Medicaid and Commercial Payers. Our systems work the same way you work now.

Claims are submitted in standard NCPDP D.0 format through your current switch to our innovative clearinghouse that in real time checks the medical benefit eligibility of the patient and then converts the claim to an ANSI X12 837 professional medical claim that is forwarded to the patient's insurance plan through the appropriate medical claims clearinghouse.

Maximize Your Profits

Using TransactRx to manage your vaccine billing will insure you are not missing any potential profits due to improper coding, missing information or under billing.

- Claims submitted through TransactRx have a payment rate near 100%.

- Medicare claims are paid at maximum fee schedule

- All claims are checked for patient eligibility in real time and claims are rejected with appropriate information such as different primary payer.

- All claims are checked against payer specific edits in real time to minimize delayed payments or denied claims.
