Global Vision Sets the Standard with New Release of its Artwork & Print Inspection Software

Latest version of Digital-Page™ / ScanTVS™ software offers unrivaled inspection technology for printing, CPG and pharmaceutical companies

Montreal, CANADA, March 21, 2013 – Global Vision, the industry leader in the development of automated proofreading solutions, today announced a new release of its Digital-Page artwork inspection and ScanTVS print inspection software (version 3.0.0).

Version 3.0.0 introduces advanced PDF tools unique to the industry for pre-press and printing companies to automate image handling. Proofreading reviews and inspections are now up to 50% faster, helping customers to reduce approval cycles and bring products out to market faster.

"Global Vision continues to deliver world class solutions to ensure text, artwork, print, Braille and barcode content integrity for brand owners, QC, pre-press and printers." explained Reuben Malz, President, Global Vision. "This latest version was developed for our customers' unique needs providing a new benchmark with inspection and reporting capabilities designed to handle the toughest challenges in the industry."

Pharmaceutical, CPG and printing companies will also benefit from the newly redesigned user interface and navigation that simplify the overall user experience. The software is fully compliant with FDA 21 CFR Part 11 requirements, while offering complete lifecycle and validation documents.

"With our expanded R&D team we will be introducing a number of technological innovations, version 3.0.0 is the first of many for 2013," continued Reuben Malz.

New Digital-Page / ScanTVS version 3.0.0 features
- Advanced PDF tools
- Ergonomic user interface - Making it more intuitive, aesthetically pleasing and end-user friendly
- Streamlined Navigation of differences
- New step-by-step inspection report
