

The New FDA Food Safety Modernization Act (FSMA) Requires:

- *FDA Inspection of Facilities that Supply Food to the U.S.*
- *Hazard Analysis and Food Safety Plans*
- *Food Defense Plans*

Prepare now with expert assistance from Registar Corp:

Mock FDA Inspection

FDA inspections differ from third party audits and inspections by other countries' food agencies. Registar Corp's mock FDA inspection helps companies prepare by providing:

- Advance review of your food safety system documentation (including HACCP records)
- Onsite visit (typically two days) by a Food Safety Expert from the USA. The inspection will identify potential food safety problems in the structure, processes, procedures and documentation used in your daily production.
- Post-visit management meeting and comprehensive written report of findings and recommendations.

Hazard Analysis and Food Safety Plans

Registar Corp will review your Hazard Analysis and Food Safety Plan as well as resulting records for completeness, effectiveness, and compliance. Additionally, Registar Corp can help you to develop HACCP and Food Safety Plans for new facilities and processes.

Food Defense Plan Development and Review

Registar Corp will review an existing Food Defense Plan or help you develop a new plan.

For assistance, select from the options below and provide your contact information in the space provided.
