**Digiscribe Invited to Serve on the FileBound Executive Partner Council**  
*Marex Group, Inc. honors long-time FileBound office automation provider Digiscribe*

**Elmsford, NY – March 26, 2013** – [Digiscribe International](#), provider of document scanning services, document management solutions and workflow automation software throughout the New York Metro area today announces their invitation by Marex Group, Inc., to serve on the FileBound Executive Partner Council, joining a select group of leading document imaging and enterprise content management (ECM) companies worldwide.

John Fox, FileBound Vice President of Channel Partner Sales, had this to say: "FileBound is pleased to welcome Digiscribe onto our Executive Partner Council. Executive Partners are selected based upon their high-level of professionalism and sustained record of success in helping businesses and organizations implement solutions that automate their processes and improve the way they manage information. Digiscribe has demonstrated a commitment to excellent customer service, and the industry knowledge brought to FileBound will drive our continued innovation and mutual success."

"We are honored with FileBound's invitation to join their exclusive Executive Partner Council," said Mitch Taube, president of Digiscribe. "As experienced providers of office and [workflow automation solutions](#), we've encountered an increase of 100% year-over-year from small and mid-sized businesses (SMBs) looking to us to automate their business processes and FileBound has been a key technology component of our overall solution."

Digiscribe has the trained personnel to properly design and implement [FileBound automation software](#) that now includes five certified FileBound Professionals and three certified FileBound Engineers. Taube commented, "We have a strong technical support team, which is unusual for companies like ours. Having so many FileBound-certified professionals speaks to our commitment to providing superior customer support and technical knowledge of FileBound office automation software."

As the economy strengthens at its currently positive but tepid pace, more SMBs seek a competitive advantage by maximizing efficiency and cutting costs with office and workflow automation as part of an overall document management solution. Up until recently, these solutions were possible only by spending hundreds of thousands of dollars in capital

expenditures, with a large cost recurring every year. Only the largest organizations could afford such a cost burden—until now with FileBound.

Companies typically implement FileBound to automate processes in accounts payable, accounts receivable, human resources and order fulfillment. The option of The Cloud reduces costs further to a very modest monthly operational expense vs. cost-prohibitive capital expense. "With the addition of mobile capture in FileBound 6.5, we expect to see continued significant growth in our FileBound business", Taube commented.
