

INVENTORY MANAGEMENT + ASSET TRACKING

ASAP BarCloud

Track High-Value Assets | Manage Multiple Locations | Fast, Accurate Tracking | Total Accountability

ASAP BarCloud

Whether you are tracking food, medical supplies, chemicals or other items, ASAP BarCloud for inventory management gives you complete tracking and control. Our technology solutions will improve your operational efficiencies, generating the highest ROI for your organization. Use ASAP BarCloud to access your data on any device—anywhere, anytime—in a secure environment. Improve your organization's profitability by eliminating manual data entry and automating records.

Why ASAP Systems?

ASAP Systems for inventory management and asset tracking is a fully customizable, barcode-based and RFID-capable system. With our web-based application ASAP BarCloud use your desktop or your smartphone or tablet with our new ASAP BarCloud App. Our software helps your organization or business to:

- Be more efficient: Using barcode or RFID technology, quickly scan and enter your inventory and data.
- Be more accurate: Minimize the risk of employees mistyping data or entering incorrect information.
- Improve workflow: Share inventory and asset reports, status and updates with employees, managers and vendors.

User Configurable

Configurability is built-in, which means no custom software fees. Rename data fields and enable user-defined fields. Turn functionality on and off if you don't use it, such as "Purchase Order." Adjust the viewing and functional preferences for each user, such as data columns and reports. Easily adjust the user interface to suite individual tastes.

Advanced Features

Customize ASAP BarCloud to the specific needs of your business with our advanced features.
