

EMA-Integrate

Post-Merger Integration (PMI) professionals use [EMA-Integrate](#) to improve integration planning, management, and synergy execution and to keep their projects on time and on budget.

Chief executives face few challenges more risky than integrating a merger or acquisition. Depending on the industry, a top-performing M&A deal can increase shareholder wealth anywhere from 4 to 65 percent above industry averages. These rewards go to companies who understand Merger & Acquisitions integration success is dependent on two primary factors: management and execution.

Whether your M&A objective is to capture maximum value, achieve benefits of scale, expand product segments, or redefine the business for a new direction; [EMA-Integrate](#) provides the essential tools to meet any integration objective successfully.

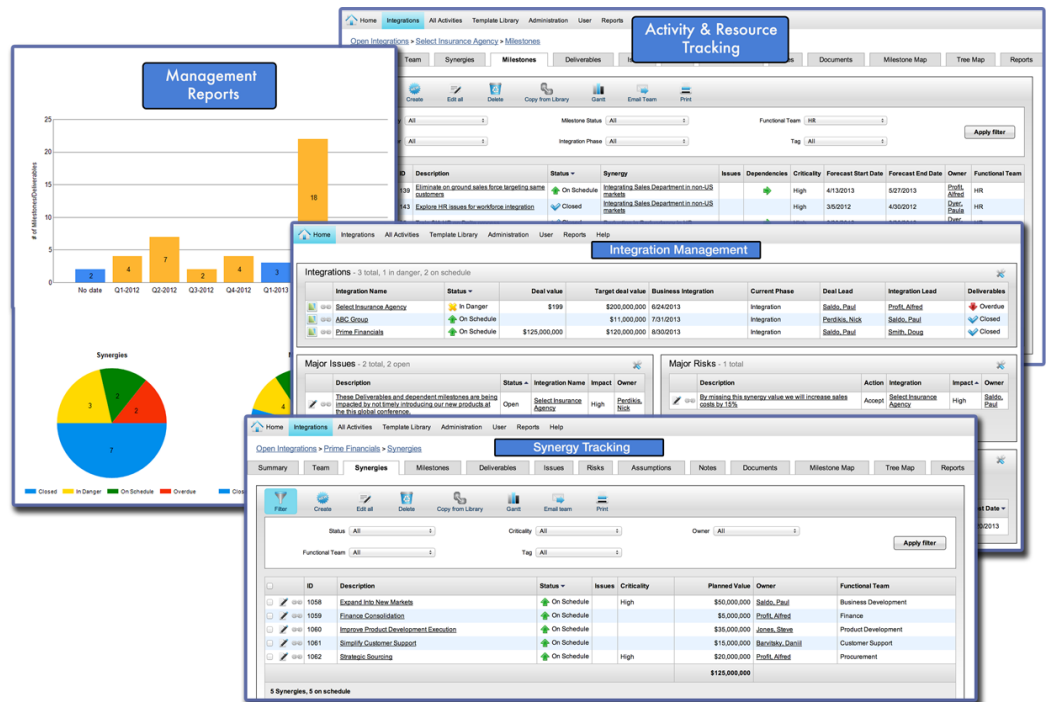

MERGER INTEGRATION SMART

For M&A professionals seeking an integrated solution to simplify and improve deal management from pre-transaction phases through synergy execution. Our solutions provide standardized business process management, deal governance and sophisticated resource collaboration to increase productivity and improve deal outcomes. If you are planning, evaluating, transacting or integrating an acquisition, [EMA-Transact](#) and [EMA-Integrate](#) are excellent solutions to accelerate M&A value drivers and increase ROI.
