

# Edison Outdoor Lighting Package

*Thomas Edison, the father of electricity, believed that artificial light could improve the health and overall quality of one's life.*

We agree with Edison that artificial light can add vibrancy to life. It can also create a relaxing visual escape at home or even add a bit of excitement around the house.

This is why we put together the Edison Outdoor Lighting Package, a customized outdoor lighting service that'll transform your home's surroundings with a mere flick of a switch.

## ***The Edison Outdoor Lighting Package*** includes:

- An initial design consultation to discuss the lighting effects you want to achieve
- A comprehensive plan that includes essential technical and aesthetic ideas for success
- An in depth, onsite design session to explore the look and feel you desire
- A professionally-installed, low-voltage LED lighting system, bringing energy savings while creating a visually satisfying experience

**Outdoor lighting** is an easy way to create a special ambiance or highlight a unique garden feature; it promotes security and can add value to your home.
