

## **Crisis Killer Review Examining New Austrian Forex Robot Released**

*SUMMARY: HonestyFirstReviews.com releases a review of "Crisis Killer" a newly launched Forex trading robot developed by a young Austrian programmer and self described "hacker" who claims the script is responsible for remarkable gains.*

Crisis Killer a new automated FX robot has just been released to the public generating a frenzied buzz of media attention, prompting an investigative review from HonestyFirstReviews.com's Tiffany Hendricks.

"While there's no shortage of automated Forex trading EAs or 'robots' capable of finding and initiating trades, many experienced traders have expressed frustration with the quality of options currently on the market," reports Hendricks. "So, when we were informed regarding the release of Thomas' 'Crisis Killer' robot we were very eager to take a look in order to determine whether this was a solution we felt we could recommend to our website visitors. The program's creator posted extensive documentation chronicling his own success using the robot to trade over a two month period, and based on the figures he has provided this was something we had to take a closer look at."

Hendricks' Crisis Killer review reveals that the robot is being provided to customers digitally online by way of a software activation license. The license is available upon receipt of a one time activation fee which entitles customer to use run the software and make use of frequent complimentary updates to keep the script up to date with the highly volatile foreign exchange market.

"While many Forex robots are marginally reliable upon their initial release, a lack of updates usually renders them completely worthless in short order," says Hendricks. "As discussed in our review, one of the things that impressed us most about Crisis Killer, is the developers ongoing involvement with the product. Because of Thomas' vested interest in the success of his robot, we anticipate that many folks will get a great deal of mileage out of Crisis Killer."
