

FULLER PICTURE.

The HAI BioDetection Kit detects MRSA, *C.difficile*, and 10 other bacteria that together account for >95% of healthcare associated infections.*

DEEPER INSIGHT.

Sequencing is the key to understanding pathogen transmission and can reveal resistance markers that characterize the threat of drug resistance

FASTER RESULTS.

12 hours from sample to sequencing results
2.5 hours for sample preparation
20 minutes of hands on time
