WEB SOLUTIONS COMPANY ANNOUNCES WEBSITE FOR TRANSLATIONAL RESEARCH

Translational Research in Aging and Longevity is engaged in ongoing translational research on nutrition, exercise, and metabolism in relation to aging and the common diseases of the aging population. Their new website that was created by AgniTEK features many resources relating to the research.

College Station, TX, July 17, 2013– AgniTEK, a nationally-recognized company for their expertise in helping organizations leverage technology to improve businesses, is pleased to announce the launch of a website for Texas A&M's Translational Research in Aging and Longevity at <http://www.ctr.al.org>. The new website was designed and created by AgniTEK associates and is live on the web.

Translational Research In Aging and Longevity is conducted by Texas A&M University's Department of Education and Human Development. This research is engaged in ongoing translational research on nutrition, exercise, and metabolism in relation to aging and the common diseases of the aging population. Those diseases include, cancer, heart failure, chronic obstructive pulmonary disease and cystic fibrosis (CF). Translation of knowledge from basic and applied sciences to care and clinical practice for older adults is the overall goal for the group. To learn more about the company's services visit their website today.

This website features links and news and events articles relating to translational research in aging and longevity. It also has a participation page that explains all the different ways that one can get involved. The website is very easy to navigate and very informative to potential participants or for people who are just looking to gain knowledge on the translational research in aging and longevity. All of these features were made possible by AgniTEK.

AgniTEK is a full service website and software solutions company serving Texas companies for over 15 years. They deliver reliability, consistency, simplicity and value in website services and software application development work. AgniTEK has been named a five-time Newman 10 Award winner and three-time Aggie 100 Award winner.
