

BLACK EDITION

D300 BE

A new revolutionizing panel clamp invented and created in Canada. It helps the professional and amateur woodworkers for all their panel works. The D300 BE is designed to erase completely the curvature of the wooden pieces, helps to get a good pressure all the four sides and reduce the amount of tools for the conventional process.

It's electromagnetic black powder coated rails make that the glue doesn't adhere to it. Really easy to clean. It's grip knob are made in aluminum with a custom made knurling.
