

The Reversal System: Review Examining Chris X's Marketing software Released

SUMMARY: *Premier internet marketing review website HonestyFirstReviews.com releases a review of The Reversal System a newly launched marketing software program hailed by experts as the "Death Star" of internet marketing.*

"The Reversal System is the brainchild of internet marketing pioneer Chris X, who after building a successful, multimillion dollar marketing empire, suddenly went 'underground' a few years ago," reports HonestyFirstReviews.com Tiffany Hendricks. "So, as one might imagine the online marketing community has been buzzing with excitement over the release of his new Reversal System software. Chris has supposedly invested a small fortune developing this new technology, and as news of the software's capabilities spreads the program is becoming one of the years most talked about marketing tools."

Hendricks' review explains that The Reversal System alerts users to new, and potentially lucrative affiliate offers they may wish to promote. Then the system makes use of proprietary voice recognition software that allows one to generate targeted website traffic without the need to preform traditional advertising or search marketing tasks.

"Many online business people waste time use antiquated traffic generation methods like article writing and content curation," says Hendricks. "While these methods did work in the past, these days they simply do not produce the positive ROI marketers are looking for. And, on top of that, many of these outdated methods like 'article spinning' can actually have a detrimental affect on website traffic. Thew thing that really impressed us about The Reversal System, that we discussed in our review was that Chris had removed the need for many of these tedious administrative tasks."

In addition to access to the Reversal System software customers will also receive unlimited email support and coaching directly from Chris X himself via a members only interface.
