

KantanMT.com

No Hardware. No Software.
No Hassle MT

Cloud Based Machine Translation Platform

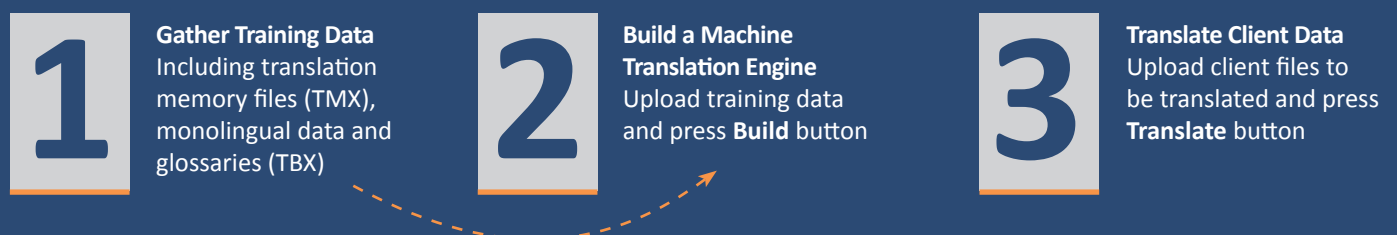

About KantanMT

KantanMT leverages the security, flexibility, and economies of the cloud to offer its members a machine translation solution that is easy to use, easy to manage, and is extremely powerful. Using KantanMT, members can build domain specific Machine Translation engines, measure the quality of their engines using automated quality evaluation metrics, and translate files using integrated Translation Memory (TotalRecall™) and Machine Translation technology.

KantanMT.com is as simple as 1-2-3

KantanMT makes Machine Translation easy. With KantanMT, you simply launch your browser, logon and go. There's no need for any special hardware or software, we provide it all.

Start KantanMT'ing today and see for yourself!

That's it! KantanMT.com makes MT easy!

What is Statistical Machine Translation?

Statistical Machine Translation (SMT) is rapidly becoming the most widely used technology for automated translation. SMT utilises statistical translation models generated from the analysis of monolingual and bilingual content. This approach uses computing power to build sophisticated data models to translate one source language into another.

“Since signing up with KantanMT, we have been able to take on more work and increase our capacity levels”

(RoundTable Studio)

Key Features:

- **Customised Engines:** Build customised Machine Translation engines using translation memories
- **Translate:** Improve translation velocity using high speed, cloud-based KantanMT engines
- **Measure:** Analyse the quality performance of your KantanMT engines using industry standard quality metrics
- **Integrate:** Seamlessly integrate KantanMT into your localisation workflow using our SDK
- **Deploy:** Rapidly deploy production ready KantanMT engines in hours rather than weeks
- **Analytics:** Clearly demonstrate ROI of Machine Translation through segment-by-segment analysis

Benefits:

- **Increased Productivity:** By integrating KantanMT Machine Translation into your existing workflows you can maximise your translation productivity
- **Increased Capacity:** Machine Translation gives you the opportunity to expand your business opportunities and take on bigger jobs, without draining your resources
- **Increased Project Margins:** Faster turnaround times on translation jobs and increased translation capacity means more money in your pocket!
- **Secure Data Storage:** KantanMT values your privacy. Client data uploaded to KantanMT.com is fully encrypted and stored on a secured server
