For Immediate Release

PMC GROUP RECEIVES NSF LISTINGS FOR CRYSTAL BAION™

Lansdale, PA (August 1, 2013) PMC Group N.A., Inc. ("PMC") announced the achievement of NSF International listings for a variety of PMC Crystal BAION™ wax blend products, including BAION 2001, 2008, 2010, 2012 and 2016. These lubricants are now accepted in Table 10 of the Plastic Pipe Institute (PPI) PVC Range Composition NSF Version 26.0, and are designed for rigid PVC pipe and pipe fittings.

BAION 2000 Series comprise a blend of paraffin wax and oxidized polyethylene (OPE). Targeted for use in pipe, pipe fittings and custom compounds, this pre-blended paraffin and OPE wax blend provides ease in formulating. Furthermore, BAION 2000 Series uses only fully refined paraffin in order to avoid die drool, screw slip and surging usually associated with low-end slack waxes in wax blends.

PMC Group's industry-leading trade names for vinyl additives include ADVASTAB™, ADVAWAX™, ADVALUBE™, ADVAPAK™, ADVAPAK™ NEO™, Thermolite®, BAION™, CrystalWax®, Kemamide® and Kemester®. These products are available in a variety of physical forms and types—custom blends, discrete components and one-packs.

About PMC

PMC Group is a growth oriented, diversified, global chemicals and plastics company dedicated to innovative solutions to everyday needs in a broad range of end markets including plastics, consumer products, electronics, paints, packaging, personal care, food, automotive and pharmaceuticals. The company was built on a sustainable model of growth through innovation while promoting social good.
