

## Achieve More with our Knowledge on Demand Analytics Platform

### Achieve Transformational Gains in Performance and Profitability

With our Knowledge on Demand Analytics Platform – a tightly-integrated package of software, services and community – we help our clients:

- Attain clinical quality measures for Patient-Centered Medical Home, Meaningful Use, Pay-for-Performance, The Triple Aim, and other quality initiatives.
- Show consumers, government and payers that they are measurably the best.
- Manage patient populations across the continuum of provider care, supporting value-based care and proactive patient engagements.

The i2i Systems Knowledge on Demand Platform encompasses three tiers of support:

- > Tier 1: i2i Solutions
- > Tier 2: i2i Professional Services
- > Tier 3: i2i Knowledge Community

“Technology alone is not enough to help providers meet today’s demands for Meaningful Use, Patient-Centered Medical Home, Pay-for-Performance, and other quality initiatives. They need solutions that marry technology with process, and they need tools with content to help them succeed, thrive and deliver a higher level of performance.”

- Janice Nicholson, President & CEO  
i2i Systems

## i2i Solutions

i2i Solutions include a comprehensive Population Health Intelligence Suite for managing preventive care and chronic conditions across populations of patients in a single site, a multi-site organization and even a multi-organization network. i2i Solutions manage the day-to-day operations of your organization, and provides strategic insights that inform and enable senior management to improve clinical, financial and operational performance.

### The i2i Population Health Intelligence Suite includes:

- **i2iTracks:** The leading Population Health Intelligence System that integrates with Electronic Health Records (EHR), Practice Management Systems (PMS), Lab vendors, Pharmacies, Immunization Registries, and other systems, aggregating data about your entire patient population.
- **i2iLinks:** A set of powerful data extraction and transformation tools combined with an extensive library of interfaces to EHRs, PM systems, labs, and others.
- **PopIQ:** A cloud-based strategic platform that integrates clinical data from multiple organizations across a network or payer group to provide comparative analytics and insights at the network and global level.

## i2i Professional Services

i2i Professional Services connects you with senior Health IT Consultants and Specialists in Data Management with extensive in-the-field experience. Taking a partnership, collaborative approach, i2i Professional Services Consultants evaluate and provide actionable solutions to help you achieve your clinical and business objectives.

### i2i Consultants will work directly with you to:

- Develop a robust data management strategy to ensure quality data
- Understand and implement clinical and operational best practices
- Optimize your i2iTracks solution to get the most out of your data

## i2i Knowledge Community

At i2i Systems, we are taking our Knowledge-on-Demand model to the next level by providing you with a community full of tools, services, news, and information to succeed!

### The i2i Knowledge Community features:

#### Reports Forum

The i2iTracks Report Forum is the best place to share and download desired reports and graphs, view how other i2iTracks users are bringing clinical data to life, and ask questions about data. If you'd like to share a report, contact [info@i2isys.com](mailto:info@i2isys.com).

#### Webinars

Re-visit recorded presentations hosted by i2i Systems Experts, Thought Leaders and Consultants, covering everything from how to design a successful healthcare analytics strategy to best practices for PCMH Recognition.

#### 360 Training

i2i Classes feature extensive hands-on computer lab training with real-world exercises—all designed for you to apply to your own system.

#### User Conferences

i2i Systems hosts an annual User Conference for i2iTracks customers to experience:

- Keynote addresses by industry thought leaders
- Expert Presentations
- Hands on-lab sessions
- Networking opportunities
- A venue to collaborate and share best practices with peers
