

What: [EC-Council's Global CISO Forum](#)

Where: Reykjavik, Iceland

When: October 7 - 8, 2013

Conference Venue: [Harpa Conference Centre](#)

Accommodations: [Hilton Reykjavik Nordica](#)

Join us for EC-Council's fifth CISO Forum and our first in Europe! The Global CISO Forum (GCF) is EC-Council's annual CISO event that brings CISOs from all over the world together to focus on the real information security threats to nations, companies, and networks. The GCF is held in conjunction with Hacker Halted, EC-Council's largest and most popular security event, creating a mix of **executives and hackers**.

Global Reach: EC-Council's CISO Program has over 1,000 participants from across industries and around the world. From our groundbreaking Certified CISO (C|CISO) Program to our high-level, exclusive events, EC-Council CISOs come from around the world, including Hong Kong, Egypt, the Netherlands, Bangladesh, Canada, the Philippines, Ghana, Sri Lanka, China, Zambia, Nigeria, the UAE, Switzerland, Mexico, the United Kingdom, Iceland, and all across the United States. Our upcoming Global CISO Forum | Europe, taking place in Reykjavik, Iceland on October 7-8, 2013, and our planned CISO Summit Bahrain in December, are increasing the Global Reach of EC-Council's CISO Program, making the program stronger through a diversity of perspectives, cultures, and security postures.

Past speakers include Erick Rudiak, CISO of Express Scripts; Gary Harbison, CISO of Monsanto; Karthik Swarnam, CISO of Trans Union; Amar Singh, CISO of News International; Curtis Levinson, US Cyber Defense Liaison to NATO; Erin Owens, CISO of Maxim Healthcare; Illyas Kooliyankal, CISO of Abu Dhabi Security Exchange; and many others discussing topics such as:

- Organization Techniques to Secure Your Workforce
- Countermeasure Culture: Battle Ready your Workforce
- Managing Security with an Outsourced Cloud Vendor
- How to Sell, Brand, and Integrate your IS Program with Business Objectives
- Wargaming
- CISOs versus Hackers
- Maturity Measurement Deep Dive
- Secure Adoption of Cloud Computing; Standing in your Vendor's Shoes

History of Excellence: EC-Council's prior events in Las Vegas, NV; Miami, FL; St. Louis, MO have been highly valuable events for our attendees and sponsors. Here's some of the feedback we've gotten from our attendees:

- "Excellent insight into an alternate definition on risk and how to answer the question "Are we secure?"
- "A great combination of solid theory and actionable guidance."
- A discussion of maturity rarely reaches that level of depth and practical application.
- "... I got a great idea during the panel discussion for an IP awareness campaign."
- "That's why I come to these things...smart people with great angles on who to improve security incrementally."
- "... differing views are best made available in conferences such as the EC-Council CISO Summit. Within these venues, lively discussions explore topics that are of interest to all security managers.
- "EC Council's CISO Summit is an excellent opportunity to interface with not only some of the largest organizations, but also the smaller ones as well."
- "It was a truly wonderful event. It's very healthy for information security executives and professionals to get together to share what's working in their own organization for the betterment of other organizations as well."
- "... very well organized with a good mix of talent from diverse industries. The topics were excellent and targeted to the need of the industry today."
