Custom Online Training Service

Save Time and Money

- ✓ Let us help you build a library of custom online training programs.

- ✓ These online programs will save your organization valuable time and enable significant efficiencies.

How the Custom Online Training Service works

- ✓ Custom Online Learning Management system specific to your operation.

- ✓ Employees can go through the slides at their own pace, and do not have to learn at the same time or be in the same location.

- ✓ When your employees answer incorrectly, they'll be redirected or "bounced back" to the applicable section.

- ✓ Questions can be formatted as either multiple choice or true/false.

- ✓ Once the training session is completed, a copy of the presentation and a certificate of completion are recorded automatically into Training Track™.
