VYSET® Custom Packs: promoting best practice

VYSET

A VYSET custom pack allows you to create a high quality pack to match your local protocol, incorporating all the items you need.

VYSET custom packs promote standardised insertion procedures, ensuring maximum barrier precautions and reduced risk of infection, ideally suited for many therapy areas including:

Peripheral venous access

- Cannulation
- Phlebotomy
- Blood culture.

Critical care

- Central Venous Catheters (CVCs)
- Arterial
- Renal.

Theatre/Obstetrics

- Epidurals
- Spinal
- Nerve blocks.

Neonatology

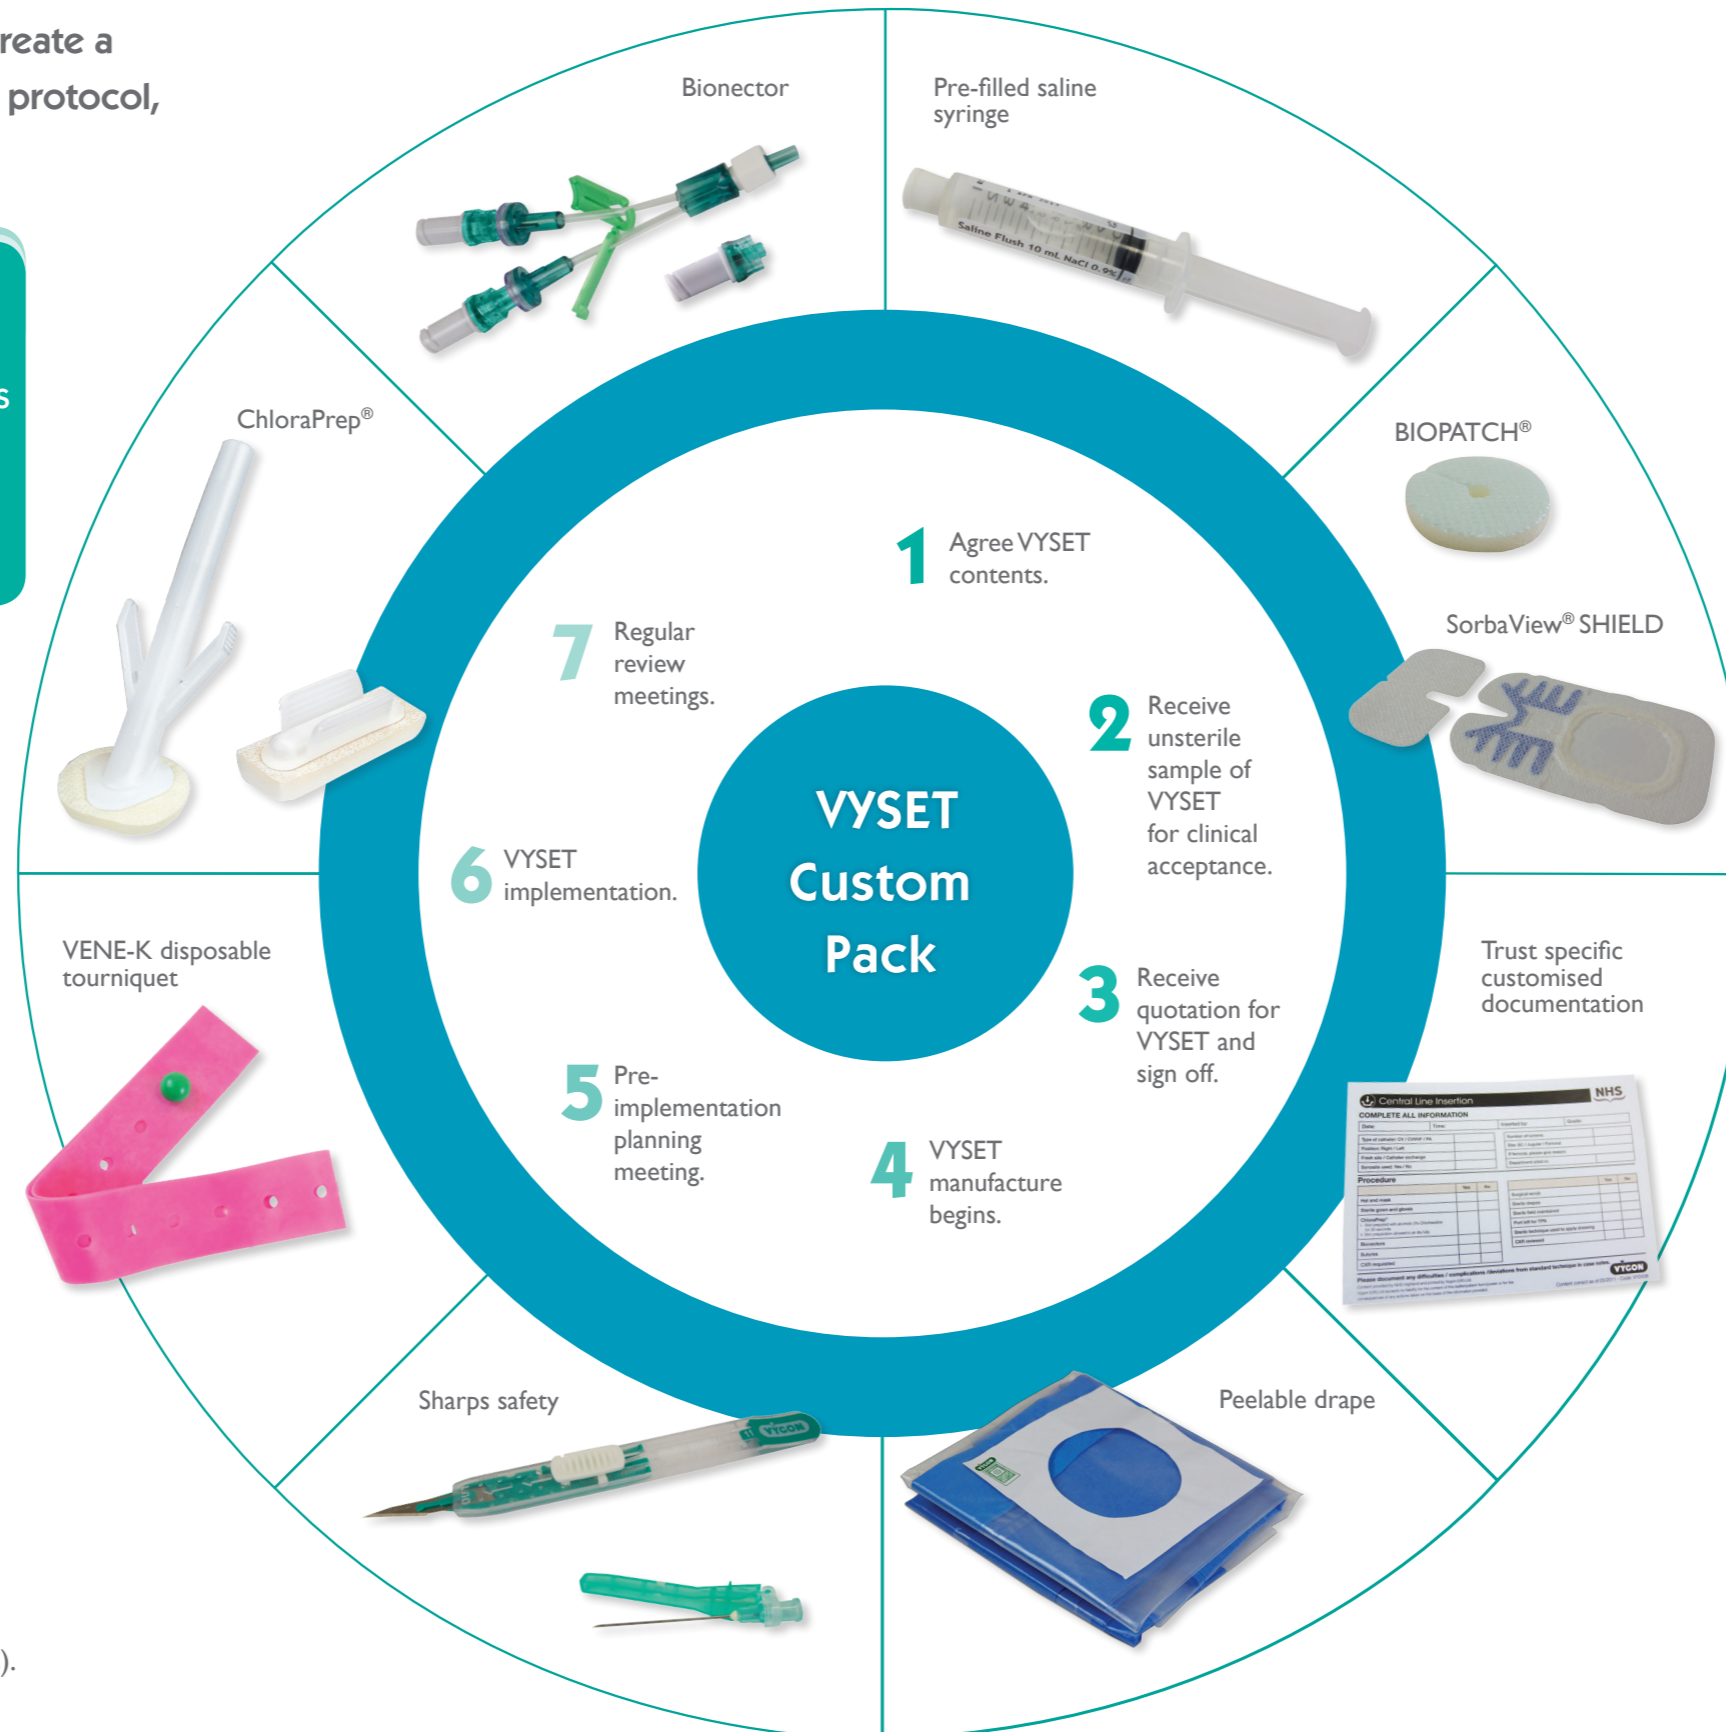

- Long line
- Umbilical.

X-ray

- Biopsy
- Basic procedure.

OPAT/Oncology

- Midlines
- Dressing change packs
- Peripherally Inserted Central Catheters (PICCs).

Helping you promote best practice:

Meeting national guidelines

- Ensuring maximum barrier precautions
- Helping you achieve EU Directive 2010/32/EU2 with our full sharps safety offering.

Saving time and money

- Reducing set-up time
- Reducing carbon footprint
- Reducing single line items.

Improving traceability

- Helping you keep track of all components with one label and one barcode.

Why choose VYSET custom packs?

From concept to implementation we will work with you to develop a high quality pack to meet your individual needs, giving you peace of mind throughout:

- Manufacturing
- Distribution
- Sterilisation
- Implementation & training.
- Warehousing

Contact the VYSET custom pack team today to discuss your requirements
