

**Net Savings of \$177,000 is possible...Learn how.**

### Old Way

	Cost	Parts Made
New Tool	\$148	2000
New Tool	\$148	2000
New Tool	\$148	2000
New Tool	\$148	2000
New Tool	\$148	2000
New Tool	\$148	2000
<b>Total</b>	<b>\$888</b>	<b>12000</b>

### Five Star Tool Way

	Cost	Parts Made
New Tool	\$148	2000
1st Re-sharp	\$30	2000
2nd Re-sharp	\$30	2000
3rd Re-sharp	\$30	2000
4th Re-sharp	\$30	2000
5th Re-sharp	\$30	2000
<b>Total</b>	<b>\$298</b>	<b>12000</b>

Tool Costs	Parts Made	Tooling CPU	-	Tool Costs	Parts Made	Tooling CPU	=	NET SAVINGS
\$266,400	3,600,000	\$0.07		\$89,400	3,600,000	\$0.02		\$177,000

**\$266,400 - \$89,400 = \$177,000 =**

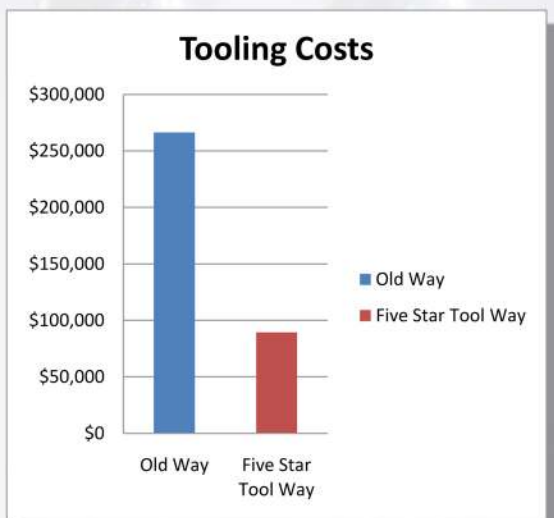

**Your new company car - Ferrari F430**

**Assume** you need to make 3,600,000 parts in one year and one new tool can make 2000 parts. If a new tool costs \$148, it would contribute around 7¢ of cost per each part made. You'll need 1,800 new tools and spend \$266,400 ( No shipping or Expedite Fees Included) to get the job done. If you used the **Five Star Tool Re-Sharpening program**, you would only need 300 new tools and re-sharpen each one 5 times. The Five Star Tool way costs only \$89,400, that includes the 300 new tools and the 5 re-sharpenings for each tool. Re-sharpening contributes a mere 2¢ to the Tooling cost per part or CPU. Re-sharpening reduces tooling costs for a **NET SAVINGS** of **\$177,000**.

You read that right **\$177,000 savings to your bottom line.**

**Five Star Too Re-Sharpening can save your company big money!**

## Five Star Tool Can Help you reduce hidden tooling costs!

- \* Reduce down time
- \* Reduce Purchase orders
- \* Reduce expedite shipping fees
- \* Free up internal resources
- \* It is a Green Initiative
