

XVC Dual-Vision™

Compact, Low Cost,
Continuous & Event
Video Recording Solution

NEW
Third Camera Option

VisionSystems

A Century of
Automotive Vision Safety

Accountability is smart business. . .

"You can't manage what you can't see."

Dual-Vision™ XC assists Fleet Managers by:

- Reducing Risky Driving Behaviors
- Increasing Safety
- Lowering Costs With No Monthly Fees

Reducing Risky Driving Behaviors

Dual-Vision™ XC continuously monitors and captures driving behavior while simultaneously providing real-time driver feedback. If the predetermined speed limit and/or G-force settings should be exceeded, the driver is notified with an audible chime. The audible chime or "alert" is a reminder to drivers that helps reinforce safe driving habits. Dual-Vision's™ continuous video helps fleets monitor and confirm that safe practices are consistently maintained by drivers. Dual-Vision's™ instant driver feedback is the equivalent of a safety expert sitting side by side with drivers and training them on safe practices that result in behavioral changes and fewer accidents.

Increasing Safety

The Rosco Dual-Vision™ XC continuous dual video recording system provides all the benefits of event based recording with the added benefits of continuous recording. This enables fleets to review video of driver behavior to identify risky actions before an event occurs. The result is a proactive "Prevent the Event" approach to safety which reduces the risk of catastrophic accidents far beyond "event only" type recording devices or standard mobile DVR systems with minimal event or driver feedback capabilities.

Lowering Costs With No Monthly Fees

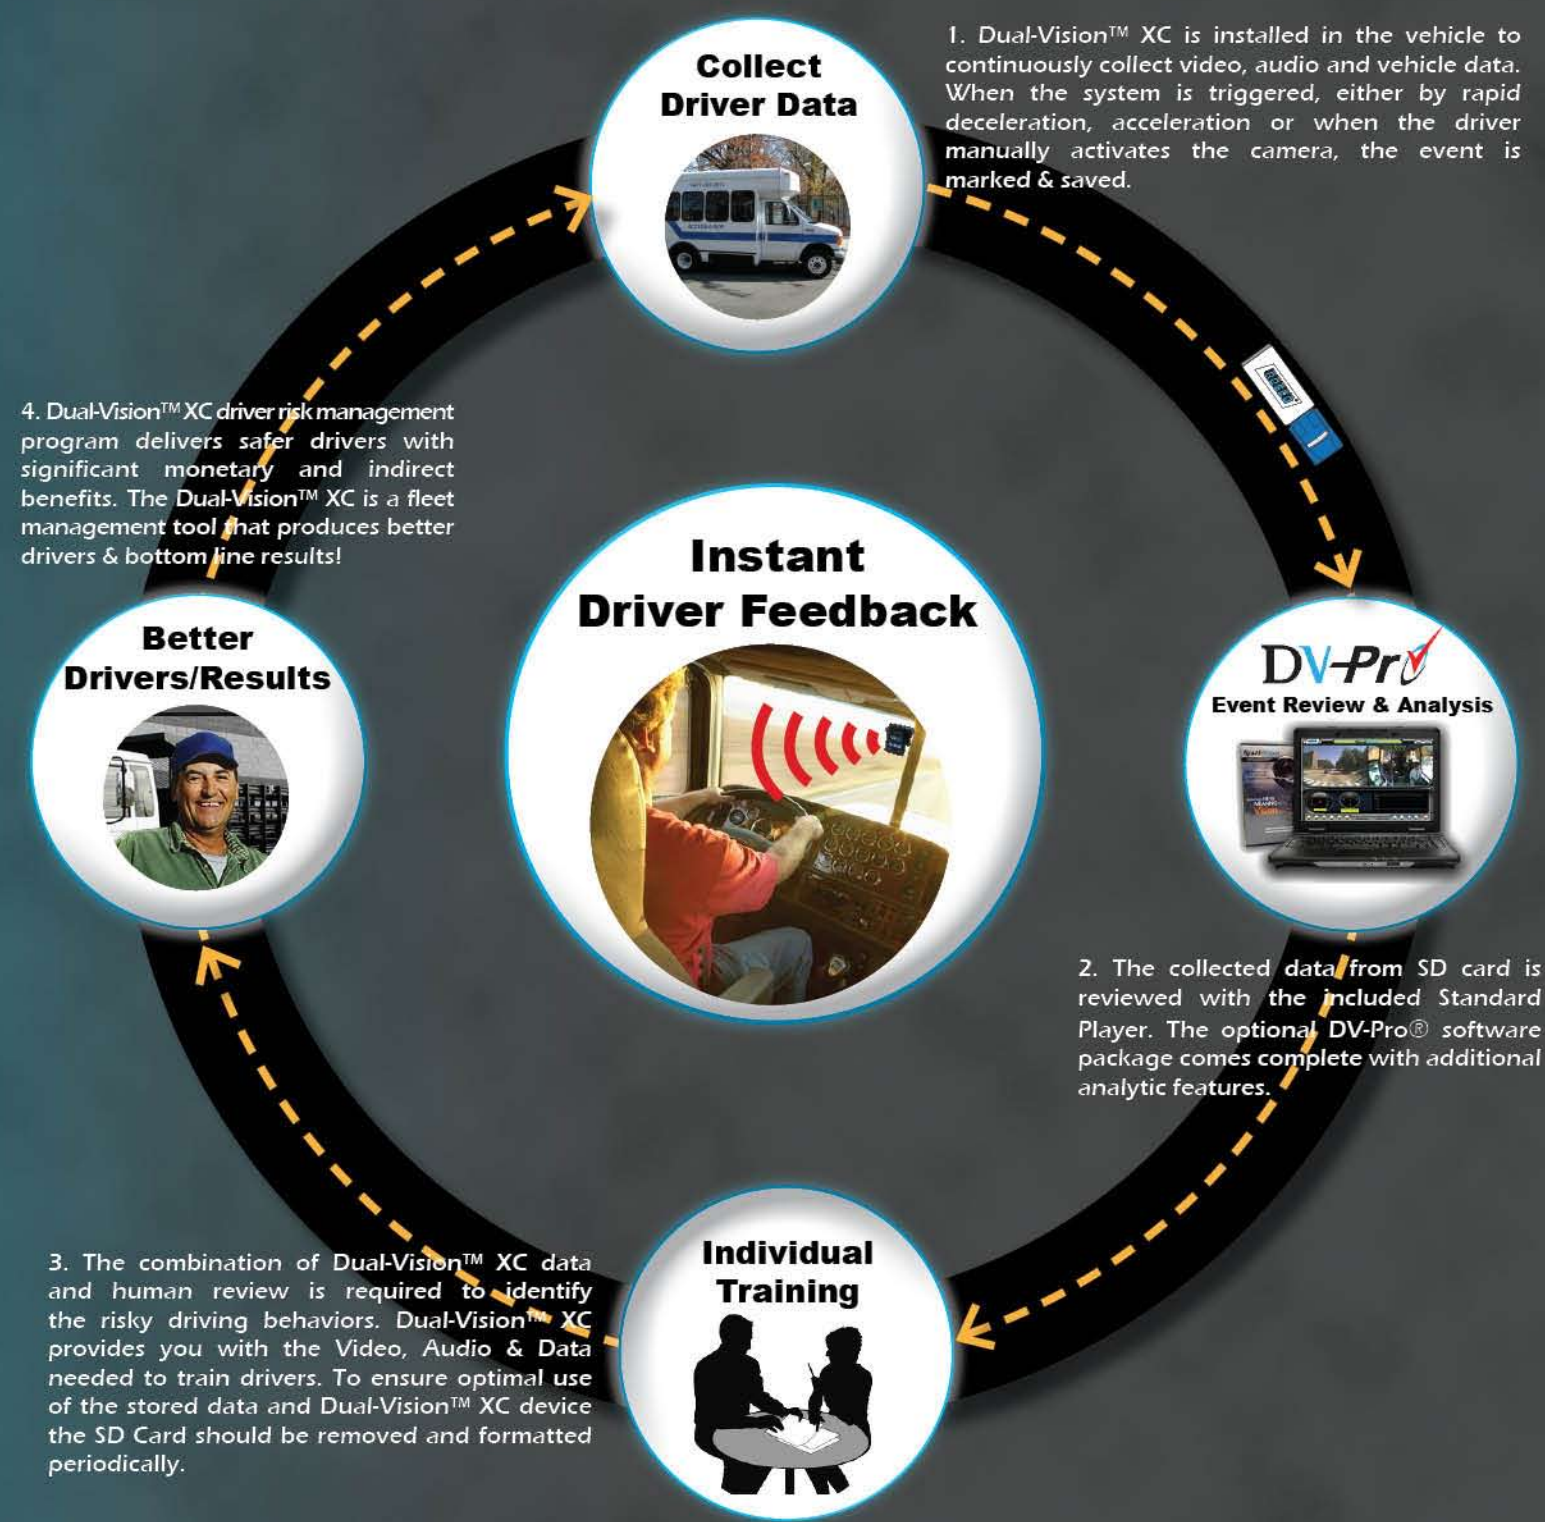

Dual-Vision™ XC increases a fleets productivity and profitability by improving driver performance at a fraction of the cost of event only, Wi-Fi and DVR recording technologies. Let Dual-Vision™ XC protect your bottom line by reducing fuel consumption, stopping dangerous driving habits before they lead to accidents, & lowering insurance premiums by reducing accident claims!

Product Highlights:

- NEW Third Camera Option
- 160+ hours of continuous video recording
- No monthly fees
- Two cameras in a single enclosure for both interior and exterior viewing
- G-force, panic, speed event recording and tagging
- Self-managed data stored on a removable SD card
- Integrated GPS tracking
- SD card security lock
- Windshield mount push lock
- Video and audio easily converted to .avi file
- Stores an event with before-and-after video in a separate folder
- Timer for 24-hour surveillance of vehicle
- Infrared LEDs for night recording
- Easy installation
- And much more...

How Dual-Vision™ XC Works: Protect Your Employees & Bottom Line

New Dual-Vision™ XC 2+1 With Standard Third Camera Availability

Component Key

- 1 - SD Card Slot
- 2 - Event Release Button
- 3 - Emergency (Event) Record Button
- 4 - Mount Push Lock

Ideal for buses, trucks, limousines and all fleets.

Complete Security for Your Vehicle

With the new third camera option, Dual-Vision™ XC is now able to provide video recording behind the vehicle, on the side of the vehicle, or of the complete interior of large buses with the simple addition of a side view camera, backup camera or interior dome camera. The main unit mounts on the inside of the windshield and provides a clear 310° of both the exterior and interior of the vehicle providing front facing views, people entering the door, driver, and front row passengers day or night. **The third camera option is able to be installed anywhere inside or outside the vehicle and provides unmatched video coverage that allows you to better manage behavior and resulting activities to ensure complete vehicle security.**

Component Key

- 5 - Built-In Speaker
- 6 - SD Security Lock
- 7 - Display Window
- 8 - Rear Facing Camera

Component Key

- 9 - Infrared Lights
- 10 - Built-In Microphone
- 11 - GPS Module/Mount
- 12 - Front Facing Camera

Comply with Federal Distracting Driving Laws

Dual-Vision™ XC assists fleet managers to comply with federal law that bans all commercial drivers from using handheld devices. Drivers who violate the restriction can face federal civil penalties of up to \$2,750 for each offense and disqualification from operating a commercial motor vehicle for multiple offenses. Commercial truck and bus companies that don't prevent their drivers from using handheld cell phones while driving are liable for millions of \$\$\$ if "compliance processes" are not in place or effective.

To view the third camera click on the number 3 button as shown to the left. The 3rd camera video appears in a separate window (seen below) playing simultaneously with the footage in the player.

STSC118

interior dome camera offers a 120° field of view & a 90° pivot, providing an excellent additional interior view of the rear of your vehicle. A Sony LCD lens makes this camera a top performer by day and with twelve infrared LEDs, the STSC118 illuminates a 30-foot field of vision during the night for safer transport.

Third Camera Options To Fit Your Application Needs

(the third camera option can be installed anywhere inside or outside the vehicle.)

STSC106

is a small cylinder shaped wide angle bullet reverse camera ideal for flush mounting in vehicle bumpers or rearpanels.

STSC109B

is a universal side and rear view camera that allows clear views of what's behind or to the side of the vehicle.

STSC112

is designed to affix over your existing rear license plate, permitting the camera to be installed on the existing license plate holes of the vehicle.

STSC141

is a standard high mount color camera with night vision and live audio feed streams through the monitor speakers. Easy to mount on most commercial vehicles.

Your Total Software Safety Solution

Maximize your data's potential with our DV-Pro® fleet management database system. This software was developed specifically for organizing information captured by Dual-Vision™ XC recording devices. It's an essential tool that simplifies managing a vehicle database. DV-Pro® makes it fast and easy to view or transfer recorded data, locate specific events on footage, archive or discard content, and compile reports or email files. DV-Pro® driver tools give greater control of information generated by high capacity Dual-Vision™ XC recorders. You can conduct searches based on detailed criteria and quickly make note of key events such as speed overages. Install DV-Pro® on your computer and vital views will be at your fingertips!

Automotive Driver Database Tool For Fleet Management

In seconds, retrieve the information you require. The Rosco automotive driver database tool is in perfect sync with our devices and your PC. The Dual-Vision™ XC recording technology surpasses basic recorders that cover isolated moments surrounding an event. Continuous AV recording gives more info and helps intergrate files into your automotive database with ease. The DV-Pro® application streamlines searches based on driver, vehicle, time or date. GPS details are revealed quickly, including routes, geofencing & other statistics. The DV-Pro® program offers a no-fee fleet database that corresponds to your needs so you can use digital information for driver training, safety improvements, and corporate decisions.

GPS Routing

Video Tagging & Notes

All of the information above is available within seconds of placing a full SD Card into any PC loaded with DV-Pro®.

More Helpful Features...

- Video Export Tool: Convert Dual-Vision™ XC files to an "AVI" file format so they can be emailed and viewed on most standard Windows media players.
- Gloss Over Preview Button: Identify different drivers without opening the video
 - SD Card Formatting and Clearing: Keep the files you want, and clear the files you don't.
- Purge Function: Allows fleet manager/IT administrator to stay within database limits

Self Managed - No Monthly Fees!

Dual-Vision™ XC is a self-managed driver risk management system. The combination of Dual-Vision™ XC data and supervisory review is required to identify risky driving behaviors. Dual-Vision™ XC provides Video, Audio, and Data through periodic SD card retrievals and review of the following with your drivers:

1. Why the Dual-Vision™ XC Event was triggered?
 - Who or what triggered the device?
2. Adjust and improve trigger settings
3. Identify risky behaviors so you can "Prevent the Event"

Dual-Vision™ XC is a cost-effective solution that empowers you to manage your own data so there are no monthly fees!

Descriptive Tagging & Notes

Use DV-Pro® software to archive footage by driver, vehicle and descriptive tags you use to highlight video segments of interest.

- Archive and organize data to allow for queries and searches by any number of descriptions on vehicle or driver criteria
- Download all or specific events based on date, driver, vehicle #, etc

Rosco has been an innovator in vision safety for over 100 years. Established in 1907, our goals have remained the same: We are committed to producing the highest quality automotive products and providing the level of service our customers have grown to expect.

Our Products are designed, largely built, and supported in the USA. Our staff has grown to over two hundred people in facilities totaling over one hundred thousand square feet.

Dual-Vision™ XC represents an economical alternative to full-scale mobile DVR systems, providing thorough coverage of the driver and loading/unloading area, external events and conditions, traffic signals, and passenger actions at a fraction of the cost of traditional technologies such as DVR recording and stand alone internal camera equipment.
