## Commercial and Industrial

## Residential and RRP

Now ECOBOND® LBP customers have a choice in which type of ECOBOND® paint to apply. ECOBOND® LBP Hybrid's advanced paint resin material represents the state-of-the-art in latex paint while maintaining all the same ECOBOND® LBP lead treatment capabilities.

ECOBOND® LBP Hybrid provides state-of-the-art:

- Excellent adhesion to a wide range of substrate material
- Extremely low moisture/vapor permeability
- Highly durable finish
  - Chemical resistant to splash and spillage
  - Corrosion resistant
  - Salt spray resistant
- Superior direct to metal adhesion
- Smooth Finish; Tan base

Which ECOBOND® LBP Product Should I Use?

ECOBOND® LBP Hybrid

- Ideal when superior adhesion, direct to metal bonding is required
- Inter/exterior applications where a smooth finish is desired
- When painted surfaces will remain in place and may be exposed to corrosive environment

ECOBOND® LBP Standard

- Recommended for remodeling/demolition activities where lead paint components will be disposed
- Interior/exterior applications where a pre-textured surface is desired
- White Base

So much more than just paint!
