

WEBEX TRAINING CENTER™

Deliver highly effective training online, complete with breakout sessions, hands on applications, interactive video, testing, attendance reporting, evaluation and grading.

MeetingZone can enable your company to increase the frequency, reach and impact of your training programmes by deploying WebEx Training Center® fully integrated with MeetingZone's high quality audio conferencing services.

Replicate all aspects of face to face training using the rich features available to train your employees, partners and customers.

Roll out new products and promotions globally in days, instead of weeks or months, and accelerate product take up by giving customers immediate easy access to online training.

Create the right environment for effective learning with high-quality video, integrated audio and multimedia sharing.

Run lively breakout sessions to stimulate and apply the learning and encourage group collaboration via polling, whiteboards, chat and threaded Q&A's.

Ensure the effectiveness of any training with fully integrated testing, polling, attendance reporting, attentiveness assessment, grading and evaluation.

Record all training programmes and build a digital library of all sessions for reference in the future.

Turn your training capability and overhead into revenue generating e-commerce venture.

Features

- Up to 100 participants per session
- High quality live video (up to 720p)
- Share multimedia, an application or a whiteboard
- Integrated registration, testing and grading
- Live breakout sessions and hands-on labs
- Threaded Q&A, chat, polling and quizzes
- Learning management systems (LMS) integration
- Record live sessions and build an on demand training library

Train your staff, partners and customers online with these powerful features

Multimedia Sharing

Trainers can share presentations, documents, videos, demonstration software, whiteboards and Flash animations and can pass sharing and annotation rights to attendees.

High-Quality Video, Integrated MeetingZone Audio and VoIP Conferencing

Trainers can see up to six video participants at a time in high-quality, full-screen mode. An innovative Active Speaker feature allows trainers to see who is speaking at all times. All participants get clear, reliable audio via MeetingZone's Telephone Bridge or voice over IP (VoIP) and can join through call-back or call-in using a toll or free phone number.

Breakout Sessions

Trainers can manually or automatically assign participants to virtual breakout rooms for group projects and brainstorming and then 'drop into' the breakout sessions to assess progress and facilitate discussion. Students can share presentations and documents, whiteboards and applications within their breakout sessions.

Threaded Q&A

Trainers can track questions and document responses using threaded Q&A. Panellists can prioritise questions, display answers publicly or privately or assign them to a colleague.

Chat

Attendees can engage in private or public chat conversations with the trainer, another attendee or the entire class.

Polls, Attendee Feedback and Attention Indicator

Trainers can collect feedback with one or more polls during a session and instantly tabulate poll results to share with the class. Students can also 'raise' their hands; the system automatically orders the requests so trainers can answer questions on a first-come, first-served basis. Trainers can gauge individual and overall group attentiveness at any point with a visual attention indicator.

Integrated Test Engine

Trainers can measure class performance by testing students before, during or after live training sessions and deliver a variety of test types, including multiple choice, true-or-false, fill-in-the-blanks and essay. Trainers can take advantage of automated grading, reporting and SCORM compliance and store and reuse tests for other sessions.

Record and Playback

Trainers can capture and store session recordings for reuse and review using the integrated Network-Based Recording capability. They can also stream recordings within live sessions or post them for students to play back at their convenience. Recordings capture all aspects of the session, including audio, data, video and annotations.

Registration and Reporting

Trainers can streamline time consuming administrative processes with self-scheduling, registration management and attendance reporting. You can get extensive reports about attendance, recorded class views, class attentiveness, test results and more. In addition, you can schedule and launch sessions with a single click directly from Microsoft Outlook.

Automated e-Commerce

Trainers can charge a fee for live or recorded instruction with self-service registration and payments, set prices for each class and create coupons. Cisco WebEx Training Center integrates with PayPal and supports transactions in the United States, United Kingdom and Canada.

Secure Cross-Platform Support

Trainers can access Cisco WebEx Training Center securely from virtually any environment, including Windows, Mac, Linux and Solaris operating systems.
