

Tree and Lawn Care News

Too Much Rain Creates Tree Problems

Record breaking rains through the summer saturated the soil and put tree health at risk. When the ground is waterlogged, trees are at higher risk for oxygen starvation. Without oxygen, trees can't absorb nutrients through the roots and immune systems can weaken. Additionally, waterlogged roots are more prone to root rot and fungal diseases.

Here are Fall's top 5 Warning Signs:

*Excessive
Deadwood*

Borers

Decay

Mushrooms

*Premature color
change or leaf drop*

If you are concerned about your trees, call us at 215-682-7704. We will be happy to schedule a root to crown inspection by your Giroud ISA Certified Arborist.
