

## Market Leader in Service Management Applications

*Developers of Industrial Tools and Molding Products Select Alert Stratus for Project Management and Planning*

Toronto, ON – September 20, 2013 **Fieldpoint Service Applications Inc.** announced today that a leader in developing and distributing industrial tools and molds has selected Alert Stratus for project management and planning.

The organization has global complexities, with several business units working in multilingual and multi-currency environments. Alert Stratus will integrate to Microsoft Dynamics GP 2010 and automate the client's manual processes. It will act as a central repository for all customer data: manage quotations, project plans, time sheets and expense details.

"Spreadsheet information is only as good as its last update. Managing quotations, time details and project pipeline through spreadsheets exposes a business to risks." says Phil Smart, Chief Operating Officer at Fieldpoint Service Applications. "If someone goes on vacation or forgets to update their information, then you could be managing your business to wrong data points."

**Alert Stratus** will streamline the project management processes and provide:

- Quotation Management
- Contract Management
- Resource Allocation and Scheduling
- Service Work Order History
- Time and Expense
- Invoicing

### About Fieldpoint Service Applications Inc.:

Fieldpoint Service Applications Inc. is a best-of-breed, service management software provider. The unified project management and field service applications optimize the entire service lifecycle; from the initial project installation to recurring maintenance work. The web-based tools enable organizations to run leaner, smarter and more profitable businesses.
