BOATRACS®

Wireless Maritime Information Solutions Made Simple™

Boatracs Broadband Fleet Management Solution

A powerful end-to-end global broadband package combining KVH mini-VSAT Broadband℠ TracPhone V3® for internet and Voice over IP with Boatracs BTConnect® for worldwide web-based fleet management.

CONTROL VESSEL PRODUCTIVITY
with fleet management software

Managing fleet assets and data is a critical part of every successful maritime operation. Boatracs BTConnect® combines mapped vessel positions with two-way messaging through a single web-based, user interface. Custom smart forms can be used to standardize data transfer. All information can be accessed from any computer or mobile device for maximum control and productivity.

COMMUNICATE EFFECTIVELY
with broadband internet and voice

KVH's global mini-VSAT Broadband℠ service delivers high-speed internet, email, voice and crew comfort through the largest and most affordable Ku-band VSAT network in the world. Turn your vessels into an office on the water communicating seamlessly with shore side operations, customers and family with crystal-clear phone calls and download speeds as fast as 2Mbps.
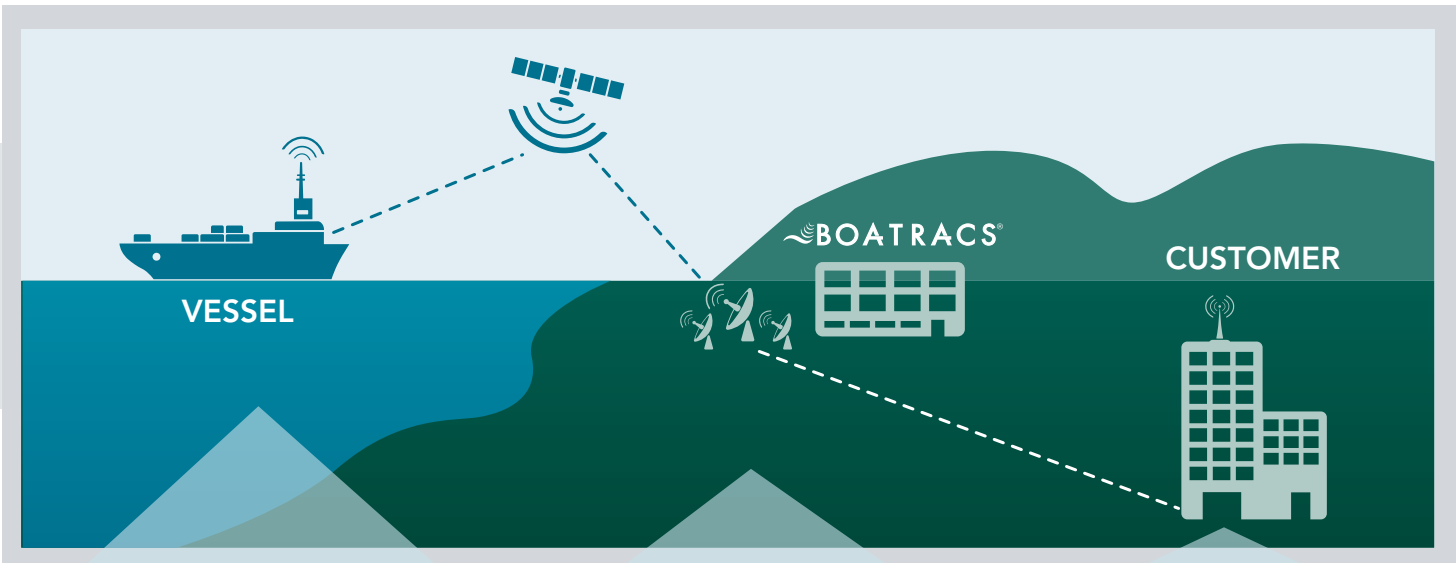

COMPETE SUCCESSFULLY
with reliable and affordable service

Satellite broadband voice and data have never been more cost effective with airtime rates now available for only $0.99 per MB of data and $0.49 per minute for calls. Connect to the Internet, access documents and email customer information. With 24 hour live customer care and excellent reception even in bad weather, we'll keep your vessels in communication at all times.
