

MIDWEST FERTILIZER CORPORATION FACT SHEET

REVOLUTIONIZING THE INDUSTRY

- The Midwest Fertilizer Corporation (MFC) project, expected to operate in Posey County, Indiana, is one of the largest fertilizer manufacturing investments in the U.S. in more than 20 years
- Posey County manufacturing facility will produce Ammonia, Urea, Urea Ammonium Nitrate (UAN) and Diesel Exhaust Fluid. UAN is a non-explosive and non-flammable liquid fertilizer used in the Midwest
- Design and construction will incorporate leading technologies to ensure safety for workers and the community
- New manufacturing facility will provide U.S. farmers a reliable source of high-quality nitrogen fertilizer replacing imports
- MFC is a U.S. company comprised of multinational investors
- MFC's lead investor - Fatima Group - is headquartered in Pakistan and is a worldwide leader in the fertilizer industry

REVITALIZING THE ECONOMY

- Midwest Fertilizer Corporation is committed to hiring local and will work with area universities and military veterans groups to recruit the best and brightest employees
- Economic impact will generate significant revenue for local businesses including restaurants, lodging, and real estate development in Posey County and the surrounding communities
- Expand tax revenue for the State of Indiana
- Posey County chosen for its business friendly environment, extremely supportive local economic development officials and its Midwest central location

\$2.1 BILLION INVESTMENT

The project is a world-class, state-of-the-art nitrogenous fertilizer manufacturing facility in Posey County

2,500 CONSTRUCTION JOBS

Thousands will help build the facility with construction beginning the summer of 2014 and ending the summer of 2017

200+ PERMANENT JOBS

Once completed, Midwest Fertilizer will employ more than 200 people in good paying jobs with competitive benefits
