### Product Innovation

Better designed for faster installation

### Excellent Value

Innovative racking solutions that minimize the total cost of installation

### Unparalleled Engineering Service

Premium engineering services to tackle any structural mounting challenge

### Total Customer Satisfaction

Superior customer service and technical support to help you succeed

Mounts**

**Ez Roof Mount  
for Shingle Roofs**

*Ez Roof Mount is tested and listed by IAPMO  
To standards IAPMO ES EC002-2011,  
ICC-ES AC286 and UL-441-96 Rain Test*

# SunBeam Flat Roof System

Versatile • Adaptable • Light Weight

All Aluminum

Maximizes the roof space

Adjustable for any tilt desired

Kauahale Makai,  
Hawaii

SUNMOD®

# EZHelio Pitched Roof System

Versatile • Easy to install • Cost effective

## Clamps

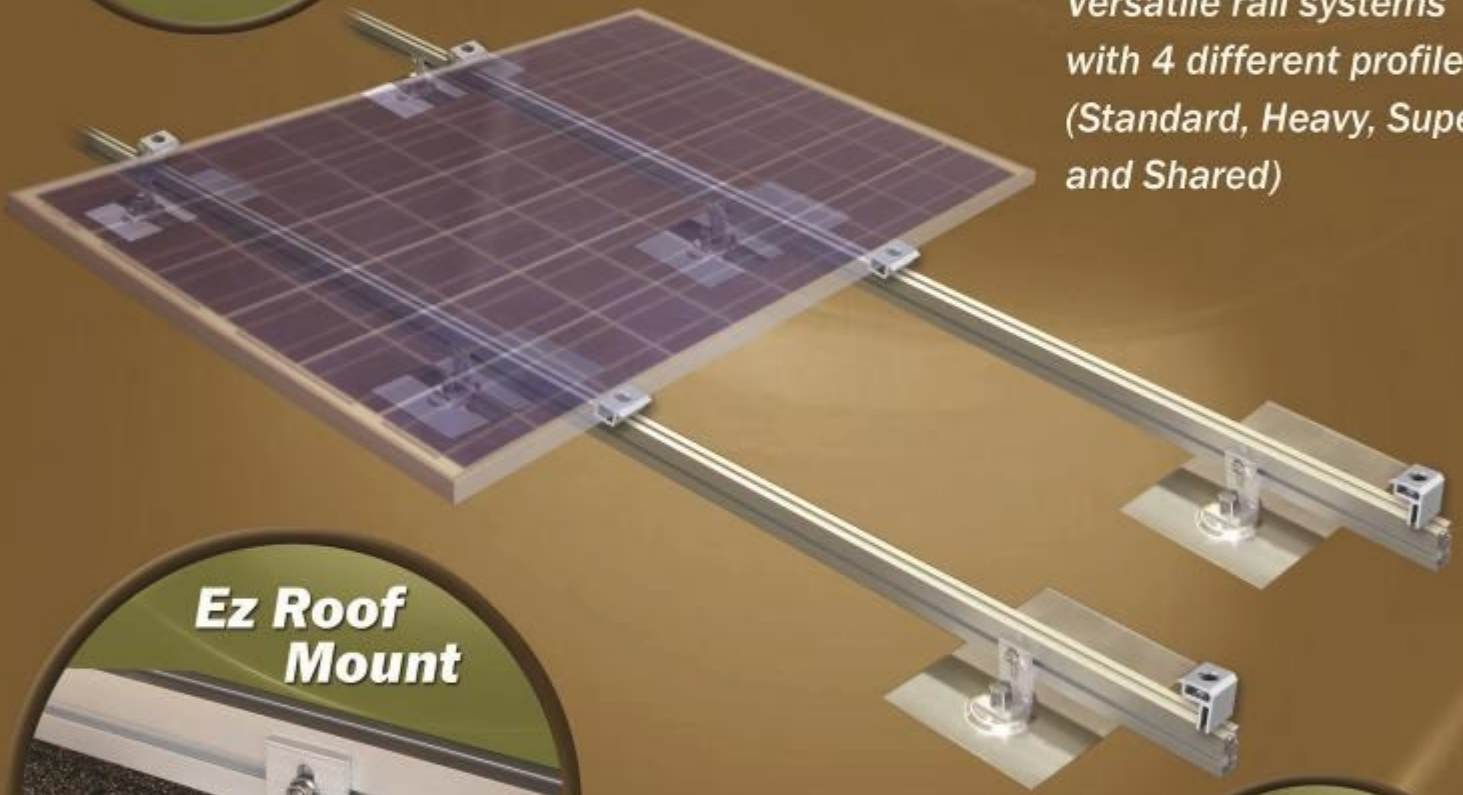

Universal End & Mid clamps designed for extra strength

## Helio Rails

Versatile rail systems with 4 different profiles (Standard, Heavy, Super and Shared)

## Ez Roof Mount

Designed to be simpler and installed faster, Ez Roof Mount is the best flashing solution available

## Splices

Rail splice kits allow for longer rows of rail and thermal expansion

# Hybrid Ground Mount System

Versatile • Scalable • Cost effective

## Angle Mounts

Durable angle mounts  
for any pitch

## Beams

Strong and tough  
for wider span

## Rails

All aluminum  
caps and sliders

## Sliders & Caps

Versatile design allows for  
use in ground mount and  
roof mount

## *The Next Generation in Solar Racking*

True leaders innovate. Innovation, however, requires a significant commitment of resources to create the absolute best solutions. At Sunmodo, we are committed to drive down the total cost of installation through product innovation and system integration.

Our best-selling Ez Roof Mount kit is the perfect example of working closely with our customers to find the best flashed mount solution for composite shingle roofs. Because of its innovative and cost-effective design, the product has become an all-time customer favorite.

After many years of extensive research and development, what began with a clean sheet of paper evolved into the next generation of full line solar racking solutions, both residential and commercial.

Going the extra mile means leading the way for innovation and setting the industry standard.
