

LOK-IT is the only secure memory storage device that balances security, usability, and cost.

Using LOK-IT is as simple as ① ② ③ ...

①

Enter your PIN...

②

...LOK-IT unlocks and the green LED illuminates...

③

...insert into ANY USB port and LOK-IT is ready to use!

...It's that easy!!!

But don't let LOK-IT's ease of use fool you into thinking your data's not secure. LOK-IT Secure USB Flash Drives® are FIPS 140-2 Level 3 Certified and all data is automatically encrypted. And, because LOK-IT uses **no software** for User Authentication, the need to enter a password using a keyboard and computer is **never** required. This makes LOK-IT immune to key board logging and with **no software**, LOK-IT is truly operating system independent. An additional benefit of **not using software** for User Authentication is that no executable files are required thereby eliminating a path malware can use to infect your computer.

LOK-IT, Enter your PIN and you're IN!

USE LOK-IT WITH ANY USB COMPATIBLE DEVICE

PCs

SCANNERS

COPIERS

PROJECTORS

MEDICAL EQUIPMENT

DVRs

TABLET PCs

Completely O/S Independent:

Systematic Development Group was honored with a Best of FOSE Award for 2011. The FOSE Conference & Exhibit is the largest in the US that focuses on technology that can meet the critical security requirements of the government.

Systematic Development Group, LLC

*Based upon DataLock®, licensed technology from ClevX, LLC - Patents Pending

Features

- Onboard 10 Key PIN Pad
- Self-contained hardware-based security
- Hardened Anodized Aluminum Casing
- Full-disk Military Grade 256 Bit AES on-the-fly hardware encryption
- 10 incorrect PIN attempts wipes PIN, encryption key and forces drive reformat
- Drive recovery in case of forgotten PIN
- Auto-Locks immediately upon disconnect or computer shutdown
- Works with all Windows, Mac, Linux and embedded/office and home-entertainment systems supporting USB 2.0
- Easy and intuitive to use
- No software required
- Can boot operating system directly from LOK-IT if desired
- Compatible with any end-point security port management system
- Rechargeable Li-Poly Battery

What's Included

- Packaged with Lanyard
- Credit Card Style Quick Start Guide
- User Guide in English, French and Spanish loaded on the drive

System Requirements

- Any operating system that supports USB 2.0 (Windows, Mac, Linux, etc)
- Security does not require any computer software / drivers
- Comes pre-formatted as FAT32
- Can be reformatted for any file system
- Available USB port (version 2.0 for faster read/write access)

Dimensions

- Overall - 78.5 mm L x 23 mm W x 11.2 mm H
- Inserted – 62.5 mm L x 23 mm W x 11.2 mm H

Certifications

- FIPS 140-2 Level 3
- USB 2.0 compliant (USB 1.1 backward compatible)
- USB-IF Certified
- FCC
- CE/EMC
- IP57 Standard - Dust and Water Immersion up to 1 meter

Part Number	Description
SDG003FM – 4GB	10 Key Anodized Aluminum - FIPS 140-2 Level 3 Validation
