Rhoades Industrial Bikes

R1 Maintenance Bike (aka Tool Bike)

This is our standard 4-wheel work bike with two (2) Stanley FatMax™ tool boxes mounted to the back frame. Now your plant personnel can be even more efficient when traveling from one end of the facility to another, because they'll always have their tools with them! Whether you need it for general maintenance, construction, security or any other purpose, this can be YOUR pedal-powered transportation solution!

V1 Work Bike

Our standard 4-wheel work bike will handle a variety of jobs with maximum efficiency. This industrial work horse gives you a 27"W x 23L" cargo area behind the seat. Perfect for those who want the flexibility of carrying an ever changing assortment of equipment, supplies or tools on the back frame. Also a great solution for those who want to configure the back frame for a specific need and have the ability to modify it after delivery.

S1 Work Truck with Wire Flatbed

This popular model gives you a 24" X 36" wire flatbed mounted to the rear cargo area to transport whatever you need. Whether it's boxes, supplies, tools, concrete blocks, toolboxes or widgets, this model can handle it. And don't worry about weight because it can handle up to 700 lbs on its 2" square jig-welded steel frame. Plus, it's just 37 1/2" wide and can go just about anywhere.

S1 Work Truck with Ladder Rack (also available with 4-Shelf Stacker option)

Now your work crews can maximize their performance by always having the right equipment on board! Our S1 with Ladder Rack gives added space over the rear cargo area with two wire flat beds – one at the top to hold a ladder and one at the bottom for stacking boxes, tools or literally anything. Or, choose our 4-Shelf Stacker for a multitude of jobs from order picking to mail or product distribution - it'll handle it! Plus, it's just 37 1/2" wide so it can go just about anywhere.

S1 Work Truck with Passenger Cab

This is the perfect solution for transporting people from one place to another. This modern-day, three person, rickshaw-style 4-wheel bike holds a driver and two passengers. It can handle up to 700 lbs on its 2" square, jig-welded steel frame, so if you need to move people around, this is your solution. The passenger cab can also be reversed to make a rear-facing cab. It even comes with a 24" x 36" storage rack on the top for transporting your passengers' belongings. See, we thought of everything!

S1 Work Truck

There's hardly a limit to what you can do with our S1 Work Truck. With a 27"W x 37"L cargo area behind the seat, it's a full 14" longer than our V1 chassis, so you have many more options for the cargo area. Worried about heavy loads - no problem. Our S1 Work Truck can handle up to around 700 lbs. on its 2" square, jig-welded steel frame. The S1 Work Truck - a great solution!

2-Person Transporter

Our very popular 2-Person Transporter allows two passengers to go from one place to another and share the pedaling, or one person can go alone. Add a cargo box on the back, and make the most of the trip. Another great feature is that both sides pedal independently. Plus, it's only 38" wide and can go just about anywhere. Add in the stability of having 4-wheels to the mix, and it's a no-brainer.

S1 Rhoades Recycler

It just can't get any greener than the Rhoades Recycler! This is the answer to your facility's recycling dilemma. We load our deluxe S1 chassis with four removable Rubbermaid Slim Jim® recycling containers in separate compartments, neatly mounted to the rear cargo area.

Now your maintenance personnel can make the most of their trips around the plant and separate the bottles, cardboard, metal and whatever - all in one trip! Keeping our environment clean with the utmost efficiency - that's what the Rhoades Recycler is all about!
