Since 2004, WonderDoc has been developing efficient and innovative ways to manage electronic health records. Built by chiropractors for chiropractors, WonderDoc's software system uses powerful tools to automate and integrate patient and practice management.

Over 10 years of research, 5 years of development, and 3 years of testing have been invested in creating the WonderDoc software system.

Many chiropractic EHR systems were originally designed as billing systems and later retrofitted EHR functionality. This is not a seamless process, leading to either functional inefficiencies and/or data instability. By focusing on a system that is "SOAP Note Centric" as the foundation for all other practice management functions, WonderDoc has created a more efficient, and reliable system.

WonderDoc is fully compliant as a 2014 Government certified EHR.

WonderDoc provides simplified solutions to EHR and practice management at an affordable price. The company pledges to offer the "personal touch" in customer care and will pledge complete satisfaction with their 60 day money back guarantee.

## Accurate Efficient Secure

- There is No Comparison when it comes to EHR software.
- WonderDoc sets the bar when it comes to insurance payments.
- WonderDoc levels the field when it comes to your competition.
- WonderDoc is a game changer.

"I wanted to write and thank you for providing a great comprehensive Chiropractic software. I used a previous noting system for years that only created SOAP Notes. I looked at Chirotouch, Platinum, EZ Notes, and Future Health. Wonderdoc offers the same features as these companies at a fraction of the price..."

~Matthew McReynolds, DC

"When initially looking for an EHR software program to begin my first chiropractic practice, I was quoted extremely high prices by many companies. Not only were the prices extreme, but they would fail to address their monthly maintenance/update fees unless I asked..."

~Juliana Marciniak, DC

"After spending 3 years researching chiropractic software, I finally found what I was looking for in WonderDoc. A program which amongst other functions, populates procedure codes based on SOAP note entries in turn reducing overhead by decreasing the amount of time and staff necessary to process each patient office visit. Neither Chirotouch, Chiro8000, Eclipse, Future Health, or ACOM is as user friendly as WonderDoc. The customer service is also excellent. I highly recommend this program, and believe in it."

~Dr. L. Scott Piscioti, Westchester County, NY

"From scheduling patient appointments to processing insurance claims, WonderDoc has made my job at the front desk run efficiently and smoothly...."

~Joyce Farrell, CA

"Easy to use for a small office but has upgrades as I grow. I have used many different programs in small and large offices. The customer services was great because I am not a computer tech I'm a chiropractor. The price was also very nice for what you get."

~William Hillger, DC
