Employee Mobile Security Awareness Training

Mobile devices provide a plethora of opportunities for sensitive information to be accidentally leaked into the public or into your competitors' hands. The kind of information that can be leaked with these devices is ever-growing and includes locational data, pictures, text messages, passcodes, calendar and meeting information, and more.

Disturbingly, according to a recent global survey of IT professionals[1], 79% of businesses had a mobile security incident in the past year. The report found mobile security incidents cost over $100,000 for 42% of respondents, including 16% who put the cost at more than $500,000.

Even more troubling, 66% of respondents said they felt that careless employees posed a greater risk than cybercriminals.

Yet nearly half of all employers do not include mobile security awareness in their security training plans[2].

> In today's busy work environment, how can you make sure your employees understand what they can do to minimize exposure and risk?
>
> *With PaRaBaL's convenient Employee Mobile Security Awareness Training.*

Our **Employee Mobile Security Awareness Training** teaches your employees how to safely use their mobile devices and avoid becoming the weak link in your organization's security.

To fit your organization's schedule and budget, PaRaBaL offers both a 30 minute online course and one hour corporate seminars, taught by our mobile security experts.

Your employees will learn about:

- The most common security challenges with mobile applications
- Understanding and avoiding social media phishing, including link baiting and SMS phishing
- The dangers of EXIF Information and how to mitigate them
- Jailbreaking and Rooting – what does it mean?
- How to optimize the security of their mobile devices, without impacting usability or productivity
- And more

Why PaRaBaL?

PaRaBaL is laser-focused on one thing and one thing only: **Enterprise Mobile Security**. Our team of experts has been helping utilize mobile devices since 2009, allowing employees to be more productive without sacrificing security posture. We designed a handful of world-class services and partnered with a small set of the best software companies in the world, creating a 100% mobile focused company with over 77 years of combined experience and vast expertise in our practice areas.

Our government clients benefit from our HUBZone location near the campus of University of Maryland Baltimore County, in Catonsville, MD. For more information on training, or other PaRaBaL products and services, please contact:
