Entrada Clients Attribute Major Productivity Gains, Better Work-Life Balance to Mobile Dictation Solution

ENTRADA RELEASES THE RESULTS OF ITS 2013 ENTRADA [MOBILE] USER SURVEY, HIGHLIGHTING IMPROVED PRODUCTIVITY, INCREASED EHR SATISFACTION AND BETTER WORK-LIFE BALANCE

NASHVILLE, Tenn., October 29th, 2013 - [Entrada](#) recently released its 2013 Entrada [Mobile] User Survey, revealing the success of its mobile dictation solution with its clients. The survey, which features results from a cross-section of Entrada's customer base, polled practices of varying size and specialty to gauge how the mobile application has [impacted productivity and workflow](#) for physicians, staff, and administration.

Several key findings emerged from the survey data:

- Organizations responded unanimously that Entrada [Mobile] was valuable to its providers'; neither specialty nor size affected this outcome. Of the groups surveyed, 62% responded Entrada [Mobile] as being 'Valuable' to their organization and 38% responded Entrada [Mobile] as being 'Very Valuable'.
- Over 96% of organizations said it was 'Very Easy' or 'Easy' for providers to adopt Entrada's [Mobile] application.
- On average, 87% of organizations found that Entrada [Mobile] had improved the group's productivity, with over 50% responding that Entrada had a 'Very Positive' impact.
- Out of the groups surveyed, 83% attested that Entrada [Mobile] impacted their providers' work-life balance 'Positively' or 'Very Positively'.
- 87% of the groups responded 'Very Positively' or 'Positively' that Entrada accelerated chart completion for their providers.
- On average, groups surveyed reduced their documentation time by over 40% with an average timesaving of one hour per provider per day.

Entrada's core [mobile application](#) syncs with a provider's existing practice management system to build the physician's active worklist, pre-populated with patient demographic information, directly on the provider's preferred mobile device. Physicians then securely use this list to capture high-quality voice dictation files. With a tap of a finger, these voice files are processed, edited and then returned directly back inside individual text fields within EHR templates, ultimately enhancing the [speed and efficiency of the documentation](#).

About Entrada

Entrada protects physician productivity before, during and after the transition to an EHR system. Since every provider's workflow is different, Entrada's cloud-based voice engine enables physicians to dictate on their terms, whether through a digital dictation and backend editing workflow or through real-time, front-end speech-to-text for those who wish to self-edit. Whether dictating from a worklist on a mobile device or from directly within the EHR with a speechmike, Entrada provides a fast, easy way to document clinical information and makes EHRs much easier to adopt and use.
