**LDM Group**  
*information for your health®*

LDM Group is a healthcare communications company that connects prescribers, pharmacists and patients to improve health outcomes through targeted communications.

# Supporting Clinical Decisions Through Targeted Communications

## Accessing Prescribers At The Point-Of-Care

LDM Group's proprietary software, PhysicianCare, makes it possible to deliver educational information in real-time to health care professionals through EMR/eRx software applications at the point-of-care.

## Prescriber Education

- Informational content delivered through the prescriber's trusted digital clinical system
- Clinically relevant content at the point-of-prescribing
- Messaging available in key visual positions, while remaining unobtrusive and easy-to-consume
- The health care professional's prescribing behavior drives message delivery

## Informed Content Delivered In Workflow

- New indications and treatment guidelines
- Article abstracts, clinical reprints
- Formulary coverage and updates
- Continuing Medical Education (CME)
- Financial offers/coupons and discounts
- Specific brand information
- Disease state treatment options

LDM Group has a proven track record of delivering programs that improve outcomes for patients and drive revenue. LDM Group's behavior changing programs educate and empower prescribers, pharmacists and patients. LDM Group's programs are consistent with the provisions of HIPAA and patient privacy.

# Educating Patients

## Improving Health Outcomes

## Generating Revenue

**Fact: Approximately 1 out of every 3 prescriptions go unfilled**

Reduce the prescription fill non-compliance gap (the difference between the number of prescriptions written and the number of prescriptions actually filled) with ScriptGuide. Triggered when a prescriber generates a prescription electronically during a medical encounter, ScriptGuide's patented technology automatically produces a message personalized to the patient. These tailored messages contain relevant and valuable educational information and patient resources. In addition, EMRs and e-prescription vendors that connect to the ScriptGuide system receive a share of the revenue from each ScriptGuide delivered.

---------------------------------------------------------------------------------------	-----------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------

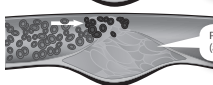

You've been prescribed **Livastat** 

Your doctor has chosen **LIVASTAT** to treat your high cholesterol. It's the first medication designed to lower your cholesterol and prevent plaque buildup in your arteries without muscle aches and pains associated with traditional cholesterol lowering medications.

**It is important to fill your prescription of Livastat today!**

Buildup of cholesterol in the lining of artery

Plaque forms (atherosclerosis)

**It's important to take your medication on time as prescribed by your doctor.**

High cholesterol can lead to atherosclerosis. Atherosclerosis is the hardening and narrowing of the arteries. It is caused by the slow buildup of plaque on the inside of walls of the arteries.

Arteries are blood vessels that carry oxygen-rich blood from the heart to other parts of the body. When this happens, the organ supplied by the blocked artery starves for blood and oxygen. The organ's cells may either die or suffer severe damage.

**Some other ways to help you lower your cholesterol:**

- Get regular exercise – 30 minutes a day, 5 days a week
- Eat foods that are low in saturated fat and cholesterol and high in fiber
- Make sure you get 8 hours of sleep each night

**Get more information**

Call **314-567-0551** or go to [www.livastat.com](http://www.livastat.com) to receive our free, monthly online newsletter, **Living with Cholesterol**.

**IMPORTANT INFORMATION REGARDING LIVASTAT:**  
 Livastat is not for everyone. Do not take Livastat if you have liver problems. It is not for women who are pregnant, who may become pregnant or are nursing. Tell your doctor about all the medications you may take. This may help avoid serious drug interactions. Do not eat grapefruit or drink grapefruit juice while taking Livastat. The most common side effects are gas, constipation, heartburn and/or stomach pain. They tend to be mild and often go away. Your doctor may perform simple blood tests to check liver function before and during the use of Livastat.  
 You are encouraged to report negative side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch), or call 1-800-FDA-1088.  
 Livastat is a registered trademark of LDM Pharmaceuticals, Inc.

# Reducing Non-Compliant Patient Behavior

## Proven Results With ScriptGuide

ScriptGuide enables your patients to be better educated and invested in their health. Decreasing prescription abandonment and improving medication compliance can produce better health outcomes.

## Therapeutic Category Examples

- Cholesterol
- Hypertension
- Osteoporosis
- Acid Reflux
- Pain Management
- Insomnia
- Women's Health
- Mental Health
- Asthma/Allergy
- Migraine and more...

## ScriptGuide Delivers The Right Message At The Key Teachable Moment

- Call to Action – Reinforce your medication decision with a clear request to initiate therapy by filling their prescription
- Education – Provide patients with information about their medication and the importance of adherence to therapy
- Financial Incentives and Resources – Enable patients to access resources and financial offers that can diminish barriers to therapy compliance

## Reduce Compliance Barriers

- Denial of the problem
- Cost of treatment
- Difficulty of the regimen
- Lack of education

## ScriptGuide Can Work For You

**Solution:** Effectively reverses the chronic challenge of getting patients to initiate prescribed therapy

**Simple:** Delivers personalized patient communications in real-time as part of the standard workflow during a consultation

**Quality:** Reinforces the physician's chosen medication therapy with information developed specifically for patients that follows FDA-approved drug labeling and supports meaningful use requirements

**Cost:** Medication compliance solution offered at no additional cost

**Accepted:** Used by thousands of physicians nationwide to improve the medication compliance of their patients

LDM Group has a proven track record of delivering programs that improve outcomes for patients and drive revenue. LDM Group's behavior changing programs educate and empower prescribers, pharmacists and patients. LDM Group's programs are consistent with the provisions of HIPAA and patient privacy.

# Copay Relief For Patients

## Initiated At The Point-Of-Prescribing

eCopay enables sponsors to provide patients with a targeted real-time copay offer. The offer is delivered to the patient via LDM Group's proprietary software that produces a print, email or text message as part of the electronic prescription order process. In addition, the adjudication information is auto-injected into the prescription notes field and automatically sent to the pharmacy as part of the standard electronic transmission or printed on the prescription. eCopay ensures that both the patient and the pharmacy will be aware of the offer and have the appropriate information.

### Drive Fill Rates By Reducing Cost Barriers

- Provide patients with copay assistance to reduce out-of-pocket expenses
- Can increase compliance and therapeutic outcomes regardless of managed care formulary status
- Printed or delivered electronically to the patient
- Empower patients to make better health care decisions

Supporting the patient and pharmacy to reduce workflow and increase brand loyalty

eCopay savings offer message and adjudication information is printed for the patients

## Prescriber Alerted, Copay Relief For Patients Initiated At The Point-Of-Prescribing

eCopay Advantage enables sponsors to inform prescribers, patients and pharmacists about a copay offer. LDM Group's proprietary software produces a message to the prescriber alerting them to the offer. The offer is then memorialized for the patient via either print, email or text message. In addition, the adjudication information is auto-injected into the prescription notes field and automatically sent to the pharmacy as part of the standard electronic transmission or printed on the prescription. eCopay Advantage ensures that the prescriber, patient and pharmacy will be aware of the offer and have the appropriate information.

### Prescriber, Patient, Pharmacy Alerted To Prescription Savings

- Prescriber alerted overlay of copay offer
- Memorialized copay offer information for the patient
- Adjudication information auto-injected or printed within prescription
- Auto receipt for the pharmacy in the electronic prescription

LDM Group has a proven track record of delivering programs that improve outcomes for patients and drive revenue. LDM Group's behavior changing programs educate and empower prescribers, pharmacists and patients. LDM Group's programs are consistent with the provisions of HIPAA and patient privacy.

# Engaging Patients

## Digital Content & Empowerment

Our unique “knowledge-to-action” cycle activates and empowers today’s digital patient. With increased knowledge, confidence and self-management skills, patients can identify when they need help, know where to find assistance and are more effective at removing barriers and solving health problems.

### Turn-key Digital Health Portals and Managed Solutions

LDM Group, with MediResource, creates disease management programs for today’s digital patient. Our digital health tools can help physicians maximize patient outcomes. All programs are based on uniquely developed content that focuses on proven behavior changing methodology.

Our digital assets help you optimize patient health and wellness, improve the practice’s bottom line and increase overall patient outcomes.

- Increase loyalty by connecting with patients. A practice can be positioned as a key partner in the patient’s healthcare team.
- Provide a complete digital practice solution - leverage all aspects of a practice, including online health information, email lists and newsletters.
- Improve searches and drive patient visits with our search engine optimization for practice websites.

### Easy To Implement, Effortless to Maintain

We understand the challenge of managing a health website or portal. To meet this challenge, we provide complete turn-key solutions. Leverage our publishing platform to eliminate the need to use your development resources. Our editorial team will provide ongoing support, including disease-specific newsletters, to ensure your solution remains current and meets the needs of your audience. Our digital team will design a solution that’s right for you.

# Digital Content That Changes Behavior

**It's a fact. 33% more people improved their health with MediResource digital health content and disease management programs\***

## We Achieve Industry Leading Results:

- Visitors predominantly searched for information for themselves (**94%**), for their partner (**43%**) or for other family members (**34%**)
- **80%** intended to return regularly to the MediResource knowledge-base for more information
- **63%** did additional research about their health situation and **41%** discussed information with a friend or relative
- **22%** of people became empowered and had a meaningful discussion with their doctor about treatment options

## Knowledge-Base Products

- Drug Fact Sheet
- Disease Database
- Lab Test Information
- Procedure Database
- Interactive Health Tools
- Natural Health
- Medication FAQ
- Wellness Word
- Feature Articles
- Your Care Plan
- Newsletter Sign up
- Health Tips
- Community Support
- Symptom Checker

# Substantial Savings For Patients

## Easy-To-Use Benefits

### A free program to help reduce the cost of medications

The CareHealth Patient Discount Card is a free resource for those patients who are seeking a discount on their prescription medications. Cash and high deductible paying customers can have a significant out-of-pocket expense. These patients can save up to 85% on their prescriptions with the CareHealth Patient Discount Card.

The CareHealth Patient Discount Card provides up to 85% savings on prescription medications at nearly 60,000 U.S. pharmacies. Everyone qualifies for the CareHealth Patient Discount Card as there are no restrictions. Patients simply need to present the card to their pharmacy with a valid prescription. Privacy is always maintained when using the CareHealth Patient Discount Card.

### Who Benefits From This Card?

- **The CareHealth Patient Discount Card is ideal for patients who:**

- Are cash paying customers
- Have high deductible insurance plans
- Are currently unemployed or do not receive employer-provided insurance
- Are prescribed medications that are not covered under their current prescription plan
- No cost and no subscription needed by the patient

# Improve Fill Rates By Reducing Cost Barriers

## Financial Relief For Patients

- Provide patients with financial assistance to reduce out-of-pocket expenses
- Increase compliance and therapeutic outcomes
- Provide a cost effective solution to address high tier co-pays
- Empower enrollment in CRM programs
- Reduce patients' out-of-pocket differential

## Savings Across Multiple Therapeutic Categories

- Cholesterol
- Hypertension
- Osteoporosis
- Acid Reflux
- Pain Management
- Insomnia
- Women's Health
- Mental Health
- Asthma/Allergy
- Migraine and more...

- Customized to the prescriber and personalized for the patient
- Drives changes in patients' behavior
- Helps reduce out-of-pocket expenses
- Resources for additional information
- MedWatch and patient opt-out
