

## Foghorn Consulting Becomes an Advanced Consulting Partner of Amazon Web Services

**MOUNTAIN VIEW, CA—November, 2013—**[Foghorn Consulting](#), a leading enterprise IT consultancy and service provider based in the Silicon Valley, announced that it has achieved Advanced Consulting Partner status with Amazon Web Services (AWS) in its AWS Partner Network (APN). APN partners consist of those who achieve an advanced level of performance and commitment to the AWS cloud platform.

The APN is AWS' global program to enable customers by connecting them with proven partners. The APN Consulting Partner ecosystem is broken down into three tiers: Registered, Standard and Advanced. APN Advanced Consulting Partners are granted access to an increased level of technical and customer services resources designed to better enable customers. As an APN Advanced Consulting Partner, Foghorn gains access to these valuable resources to the benefit of its customers.

"Becoming an Advanced Consulting Partner is an accomplishment that formalizes our competence and commitment to the AWS platform," said Alex Roosakos, Foghorn's co-founder and Principal. "We are very excited to be in a position to deliver on our mission and maximize the value we bring to our customers' AWS cloud initiatives."

Foghorn Consulting assists startups and enterprise companies as they migrate to AWS, and then manages those AWS environments once they are successfully in the cloud. By doing this, Foghorn enables customers to focus on their applications rather than servers and infrastructure.

Please contact Alex Roosakos for more information.
