

To whom it may concern:

This letter confirms that *Cadence Assurance LLC*, an affiliate of *The Cadence Group*, has performed an attestation of the hosting and data center services at *Fibernet Corp.* and *NetHosting.com*, according to their assertion contained within the report. This attestation was performed in accordance with the American Institute of Certified Public Accountants' (AICPA) *Statement on Standards for Attestation Engagements (SSAE) No. 16, Reporting on Controls at a Service Organization*. At the conclusion of the attestation, we formally issued a "Report on Fibernet's Description of its Hosting and Data Center Services and on the Suitability of the Design and Operating Effectiveness of Its Controls" (Type II SSAE16/SOC1 Report) regarding the design and operating effectiveness of controls during the period from October 1, 2012 to September 30, 2013 related to the following control objectives at *Fibernet Corp.* and *NetHosting.com*:

- **Human Resources and Training** - Controls provide reasonable assurance that human resource practices and training programs are in place to ensure that datacenter and support personnel have sufficient competency and are adequately trained.
- **Datacenter Physical Security** - Controls provide reasonable assurance that physical access to the datacenter is adequately restricted.
- **Datacenter Environmental Controls** - Controls provide reasonable assurance that the datacenter facilities housing customer data are protected and monitored to reduce the risk of environmental hazards.

No relevant issues or exceptions were noted during the course of our testing, and we issued an opinion that the controls were designed and operating as described within the report.

Cadence Assurance LLC
