

**FOR IMMEDIATE RELEASE**

**Reverb Networks participates at the 6<sup>th</sup> Annual LTE North America Conference, November 20-22, in Dallas, Texas**

**Sterling, Virginia** (November 11, 2013) – Reverb Networks, a developer of intelligent SON solutions designed to provide mobile network operators with improved operational and spectral efficiencies, is participating at the 6<sup>th</sup> LTE North America conference in Dallas, Texas from November 20 through 22. Dr. Nicolas Cotanis, CTO will be participating on the panel: “Small Cells and SON.” Dr. Cotanis’ focus will be on the full value of SON in terms of small cell integration into broader HetNets, and a number of high value SON use cases.

**About Reverb Networks**

Reverb Networks is a pioneering provider of automated, continuous and antenna-based Self-Optimizing Networks (SON) solutions. Reverb’s IntelliSON enhances networks of Mobile Network Operators through frequent and proactive self-optimization that improves network coverage and capacity and increases spectral efficiencies. In partnership with Reverb Networks, operators can maximize the performance of their wireless network automatically and efficiently, resulting in lower OpEx and CapEx. Reverb’s SON applications include Load Balancing, ANR, MLB, MRO, Interference Reduction and Self-Healing for both UMTS and LTE network technologies.

Headquartered in the United States, Reverb Networks has presence in the Americas, Europe, Middle East, and Asia, and offers support across the globe. For more information, visit [www.reverbnetworks.com](http://www.reverbnetworks.com).
