Montage Healthcare Solutions developed Montage Search and Analytics™, a unique tool for helping radiology leaders succeed in the Imaging 3.0™ era. As radiology shifts from volume-based to value-based imaging, radiology productivity, quality, and safety improvement tools will be crucial for success. Montage Search and Analytics™ is an important part of any Imaging 3.0™ Toolkit. It ensures radiology decision makers can rapidly access actionable information that facilitates this shift. Meaningful quality, outcomes, patient safety and productivity understanding can be extracted from the unstructured radiology narrative in RIS or EMR systems by leveraging the power and simplicity of search and natural language processing. Complex clinical quality questions can easily be answered, while the customizable analytics tools speed assessment of business performance and clinical quality.

Montage Healthcare will be at RSNA 2013 in booth 1905, in the South Hall.

Montage Leadership

William Boonn, MD

Dr. Boonn is President and CEO of Montage Healthcare Solutions. Previously, he was Chief of 3D and Advanced Imaging, Associate Director of Imaging Informatics, and Assistant Professor of Radiology at the University of Pennsylvania. He completed his diagnostic radiology residency and cardiovascular imaging fellowship at the University of Pennsylvania and an additional Imaging Informatics fellowship at the University of Maryland. Dr. Boonn is actively involved in the radiology informatics community, holding chair and committee positions with the Radiological Society of North America and American College of Radiology. Dr. Boonn also serves on the Board of Directors for the Society of Imaging Informatics in Medicine.

Jay Shah, CPA, MBA

Mr. Shah is the Chief Financial Officer for Montage Healthcare Solutions. He has over 25 years of experience with several companies, helping them with corporate finance, fund raising and exits. He has been involved with over 30 successful acquisition / divestiture transactions with an aggregate purchase price of over \$1 billion. Prior to Montage, Mr. Shah worked with several healthcare startup companies including successful exits of CareGain Inc. and HxTechnologies Inc. Mr. Shah previously worked with private equity backed Hights Cross Communications and Primedia in various capacities, including CFO and COO. Mr. Shah began his career at PriceWaterhouseCoopers working in the Emerging Business Services group. Mr.

Montage Healthcare Solutions Company Backgrounder

Shah holds the Bachelor of Science in Accounting from New York University, and Masters of Business Administration from Columbia University. He is also a New York State Certified Public Accountant. Mr. Shah is an Ex-Advisory Board Member for the CFO Alliance and for New Jersey Technology Council's CFO Advisory Board.

Woojin Kim, MD

Dr. Kim is co-founder and a member of the Board of Directors for Montage Healthcare. He is the Interim Chief of Division of Musculoskeletal Imaging and Director of Center for Translational Imaging Informatics at the University of Pennsylvania. Dr. Kim was one of the principal developers of Yottalook™, the premier radiology-centric search engine and co-founder of iVirtuoso Inc. Dr. Kim completed his undergraduate studies at Brown University and continued with his medical school, radiology residency, and MSK fellowship training at the University of Pennsylvania. In addition, he completed an Imaging Informatics Fellowship at the University of Maryland.

Curtis Langlotz, MD, PhD

Dr. Langlotz is a co-founder and member of the Board of Directors for Montage Healthcare. Dr. Langlotz is Professor and Vice Chair for Informatics in the Department of Radiology at the University of Pennsylvania and Associate Chief Medical Information Officer for Medical Imaging at the University of Pennsylvania Health System. He is responsible for the technical strategic direction of a filmless, paperless radiology department that performs over 1,000,000 exams annually at 3 hospitals and the associated community practice. Dr. Langlotz founded Access Radiology, a medical image distribution and management company (now part of Merge Healthcare), as well as, eDictation, Inc., a provider of automated reporting systems for radiology practices.

Rajan Agarwal, MD, MBA

Dr. Agarwal is a co-founder and member of the Board of Directors for Montage Healthcare. Dr. Agarwal is a private practice radiologist in the Philadelphia area. After completing the joint MD/MBA program at the University of Pennsylvania School of Medicine/Wharton School of Business, he completed the diagnostic radiology residency and nuclear medicine fellowship programs at Penn. Dr. Agarwal has significant business experience, which includes time as an Associate for McKinsey & Company, a leading strategic management consulting firm, and founding his own consulting company (Global Radiology Associates).

Note - Imaging 3.0 is a trademark of the American College of Radiology
