PRESS RELEASE

COPPER CAN MOONSHINE® BRAND LAUNCHES IT'S NEW LINE OF TRADITIONAL MASH BASED MOONSHINE

Experience Tradition in a bottle with Single Pot Distilled Spirits from Copper Can Moonshine®

Mt. Airy, GA, December 12, 2013 - Just as it's been done for many years long past, we collect the purest mountain spring water from the Annandale Plantation Spring in Habersham County, Georgia. It's the only water used in our Century and a half old family recipe and is of the purest you'll find. Taking great care and utilizing only the finest ingredients, our recipe has been meticulously mastered over the past 100 years and remains true to this day.

Being a "Spirit Distilled from Grain" makes for a "purer" Moonshine and separates Copper Can from your run of the mill "Grain Neutral Spirit" segment. This leaves the true, intended taste intact, instead of burning off the subtleties of the Corn, Barley & Rye which we spend so much time hand selecting.

With our roll-out, we introduce "The Line of 5", in of which we showcase Copper Can Moonshine® White and our four very painstakingly mastered specialty flavors; Copper Can Moonshine® **Honey**, Copper Can Firemoon Moonshine® **Cinnamon**, Copper Can Moonshine® **Cherry Pie** and Copper Can Moonshine® **Apple Pie**.

Copper Can Moonshine® - White - 47.5% alc./vol x (95 proof) x 750mL

Our baby, our passion, tradition poured directly into a bottle with love, our Copper Can Moonshine® "White" has endured the test of time. Like an old story passed down from generation to generation, it's only gotten better with tradition's endurance. The centerpiece and base for the entire product line, we set the standard for pure quality and craftsmanship long ago. Today the tradition continues to grow!

**Using only natural flavors with wholesome Essential Oils, our specialty flavors combine the past with the present in a manner only in which a Master Distiller could craft.*
