

Chase Cooper's aCCelerate software voted best in the world for Enterprise-wide Operational Risk Management in the Annual Technology Rankings by Risk Magazine

CHASE COOPER
creating corporate value

Chase Cooper today announced that its software solution aCCelerate has been ranked First for Enterprise-wide Operational Risk Management in the annual Risk Technology survey conducted by Risk Magazine.

The aCCelerate suite was ranked first in all categories covering each of the core functionalities required from an Enterprise-wide Operational Risk management system i.e. risk control and self- assessment, key risk indicators and internal loss management as well as the functionality required for capital calculation.

John Kiddy, Chief Executive, commented "The recognition from industry professionals of our efforts in creating the leading Enterprise-wide Operational Risk Management system in the market is a massive motivation for us to continue to enhance and improve the software even further. From the outset we set out to develop the best solution possible to provide value to as many relevant industry participants as possible. We are committed to ongoing research and further development to future proof our clients' investment and continually to exceed their expectations".
