

ChainDrive Point of Sale

A dynamic, feature rich, revolutionary and intelligent Retail Point of Sale System.

- ✓ Expedite POS transactions with a fast, intuitive and easy to use system with touchscreen capability.
- ✓ Boost in-store efficiency, enhance customer service and increase sales using ChainDrive retail POS on a windows based tablet.
- ✓ Eliminate errors and speed up credit/debit processing with integrated payment.
- ✓ Achieve real-time visibility of stock availability using product lookup by location.
- ✓ All price changes and movement requests are displayed directly on the POS, including the ability to confirm completion.
- ✓ Seamlessly process inter-store transfers and receiving.
- ✓ Maintain customer loyalty, retention and increase conversion rate with CRM.
- ✓ Monitor staff performance and improve workforce efficiencies.

Mobile POS

Mobilize your sales staff and enhance your customer connection and service using ChainDrive POS on a tablet. ChainDrive Mobile POS allows your sales staff to deliver the best personalized one-on-one in store experience. Armed with a windows based tablet your staff will be able to service your customers anywhere throughout the store; meeting their demands, decreasing transaction times and cultivating customer loyalty.

CRM Software

Capture and collect customer data and demographic profiles, maintain customer loyalty, understand the shopping patterns of your customers and fuel customer centric marketing campaigns with ChainDrive Retail Point of Sale.

Product Look-Up

The product look-up feature is so intelligent it allows you to locate product inventory right down to the SKU level within a store, chain wide or throughout the entire supply chain including warehouse locations. You can also locate a product by simply adding a description in the search field.

Promotional Rules Manager

Fully transparent at the POS, the Promotional Rules Manager feature has been designed to allow retailers the ability to create multiple and layered promotional campaigns that can be launched chain wide and/or client or store specific.

Workforce Management

Our Point of Sale Workforce Management tool provides various functionality features such as copy/paste, view and print, actual versus schedule monitoring, security and control settings and hourly rounding rule options. All hours are fed back to the ChainDrive centralized database for payroll compiling, processing and analytics.

Settings

Gain full control over your retail Point of Sale – ChainDrive's user- definable action and security settings allow you to do just that by letting you configure your point of sale environment to your specifications. Using the many action and security parameters you will be able to oversee workforce management, discount rules, access to the till and much more.
