

Sales Gravy Launches New Job Search App on Facebook

Sales Gravy makes it even easier for sales job seekers to connect with top employers with its new Facebook sales job search app.

Augusta, GA (PRWEB) December 17, 2013

[Sales Gravy](#), the leading sales employment website and sales talent community, recently announced the addition of a Sales Job Search App to its Company Facebook Page. The app allows job seekers to quickly and conveniently search more than 50,000 sales jobs posted by employers on the Sales Gravy website, right from Facebook.

In today's tech-savvy world, many job seekers have turned to social media to find jobs. Sales Gravy has capitalized on this trend by launching an app within their Facebook page that makes it even easier for salespeople to search and apply for sales jobs.

"We are thrilled to launch our new Sales Jobs APP on Facebook. Now millions of Facebook users may search for sales jobs without ever leaving the Facebook ecosystem," explains Jeb Blount, CEO of Sales Gravy. "Sales Gravy continues to make investments in social media and mobile technology, which is why we are the smart choice for employers who need to find better salespeople fast."

The new Facebook APP continues Sales Gravy's mission to provide innovative methods that better connect top sales talent with employers. Earlier this year Sales Gravy launched an innovative mobile job board platform, giving job seekers the ability to search and apply for sales jobs on smart phones and other mobile devices.
